AUTHORS Columbus, Tom

## Viewer Anatomy

## Task In Focus - Construction & Click Targets

24px 16px 8px

### MAXIMIZED TASK

Task Description gets 65% of available screen width or whatever % is remaining after Task Details are displayed

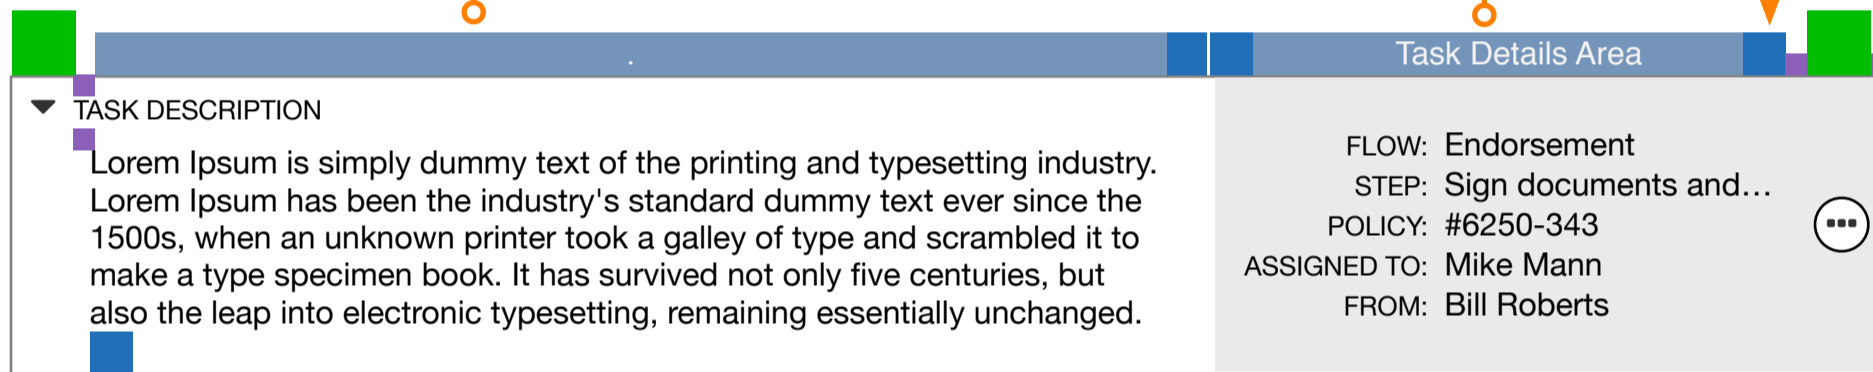

Task Details occupy a minimum of 25% of the available screen width & max out at 35% of available screen width. The width can vary between those percentages as needed  
*See Example A*

Ellipse area (if needed)  
When an ellipse is used a tooltip should be available to display any truncated text

Task Details Area

Task in Focus's height is determined by the height needed to display the entire description or details without scrolling plus 16px padding at the base

*See Example A*

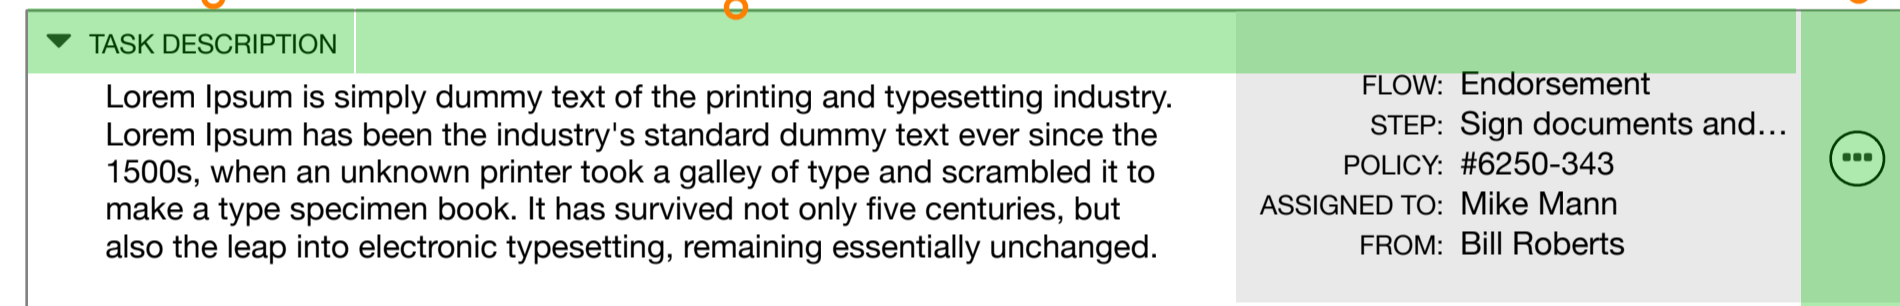

### MAXIMIZED TASK - Click Targets

Minimizes task description

Brings focus to the document associated with the Task. Focus applies to both the viewer and the file tree

Displays actions menu

### MINIMIZED TASK

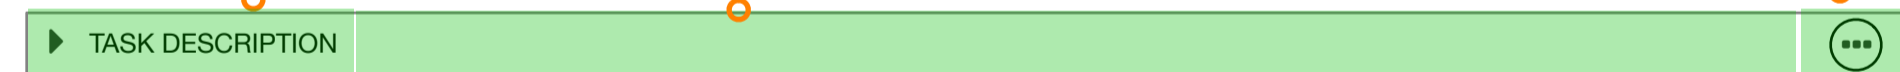

### MINIMIZED TASK - Click Targets

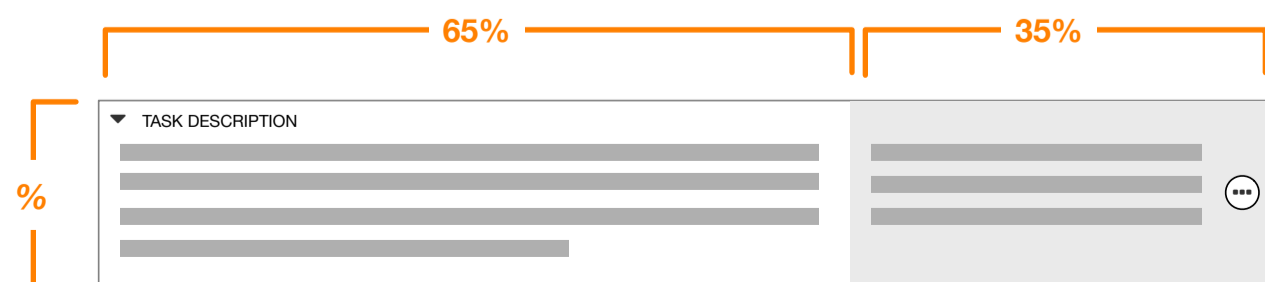

Maximizes task description

Brings focus to the document associated with the Task. Focus applies to both the viewer and the file tree

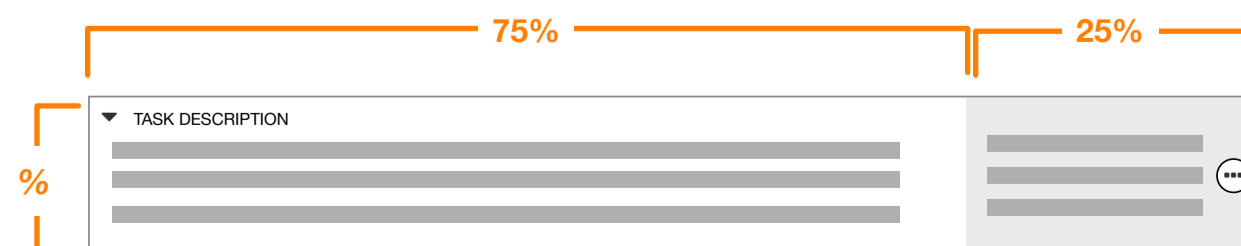

Displays actions menu

### Example A

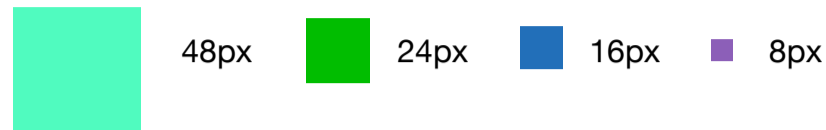

\*MAXIMUM TASK DETAIL ALLOWED

\*MINIMUM TASK DETAIL NEEDED

## File & Folder Node Viewer Construction

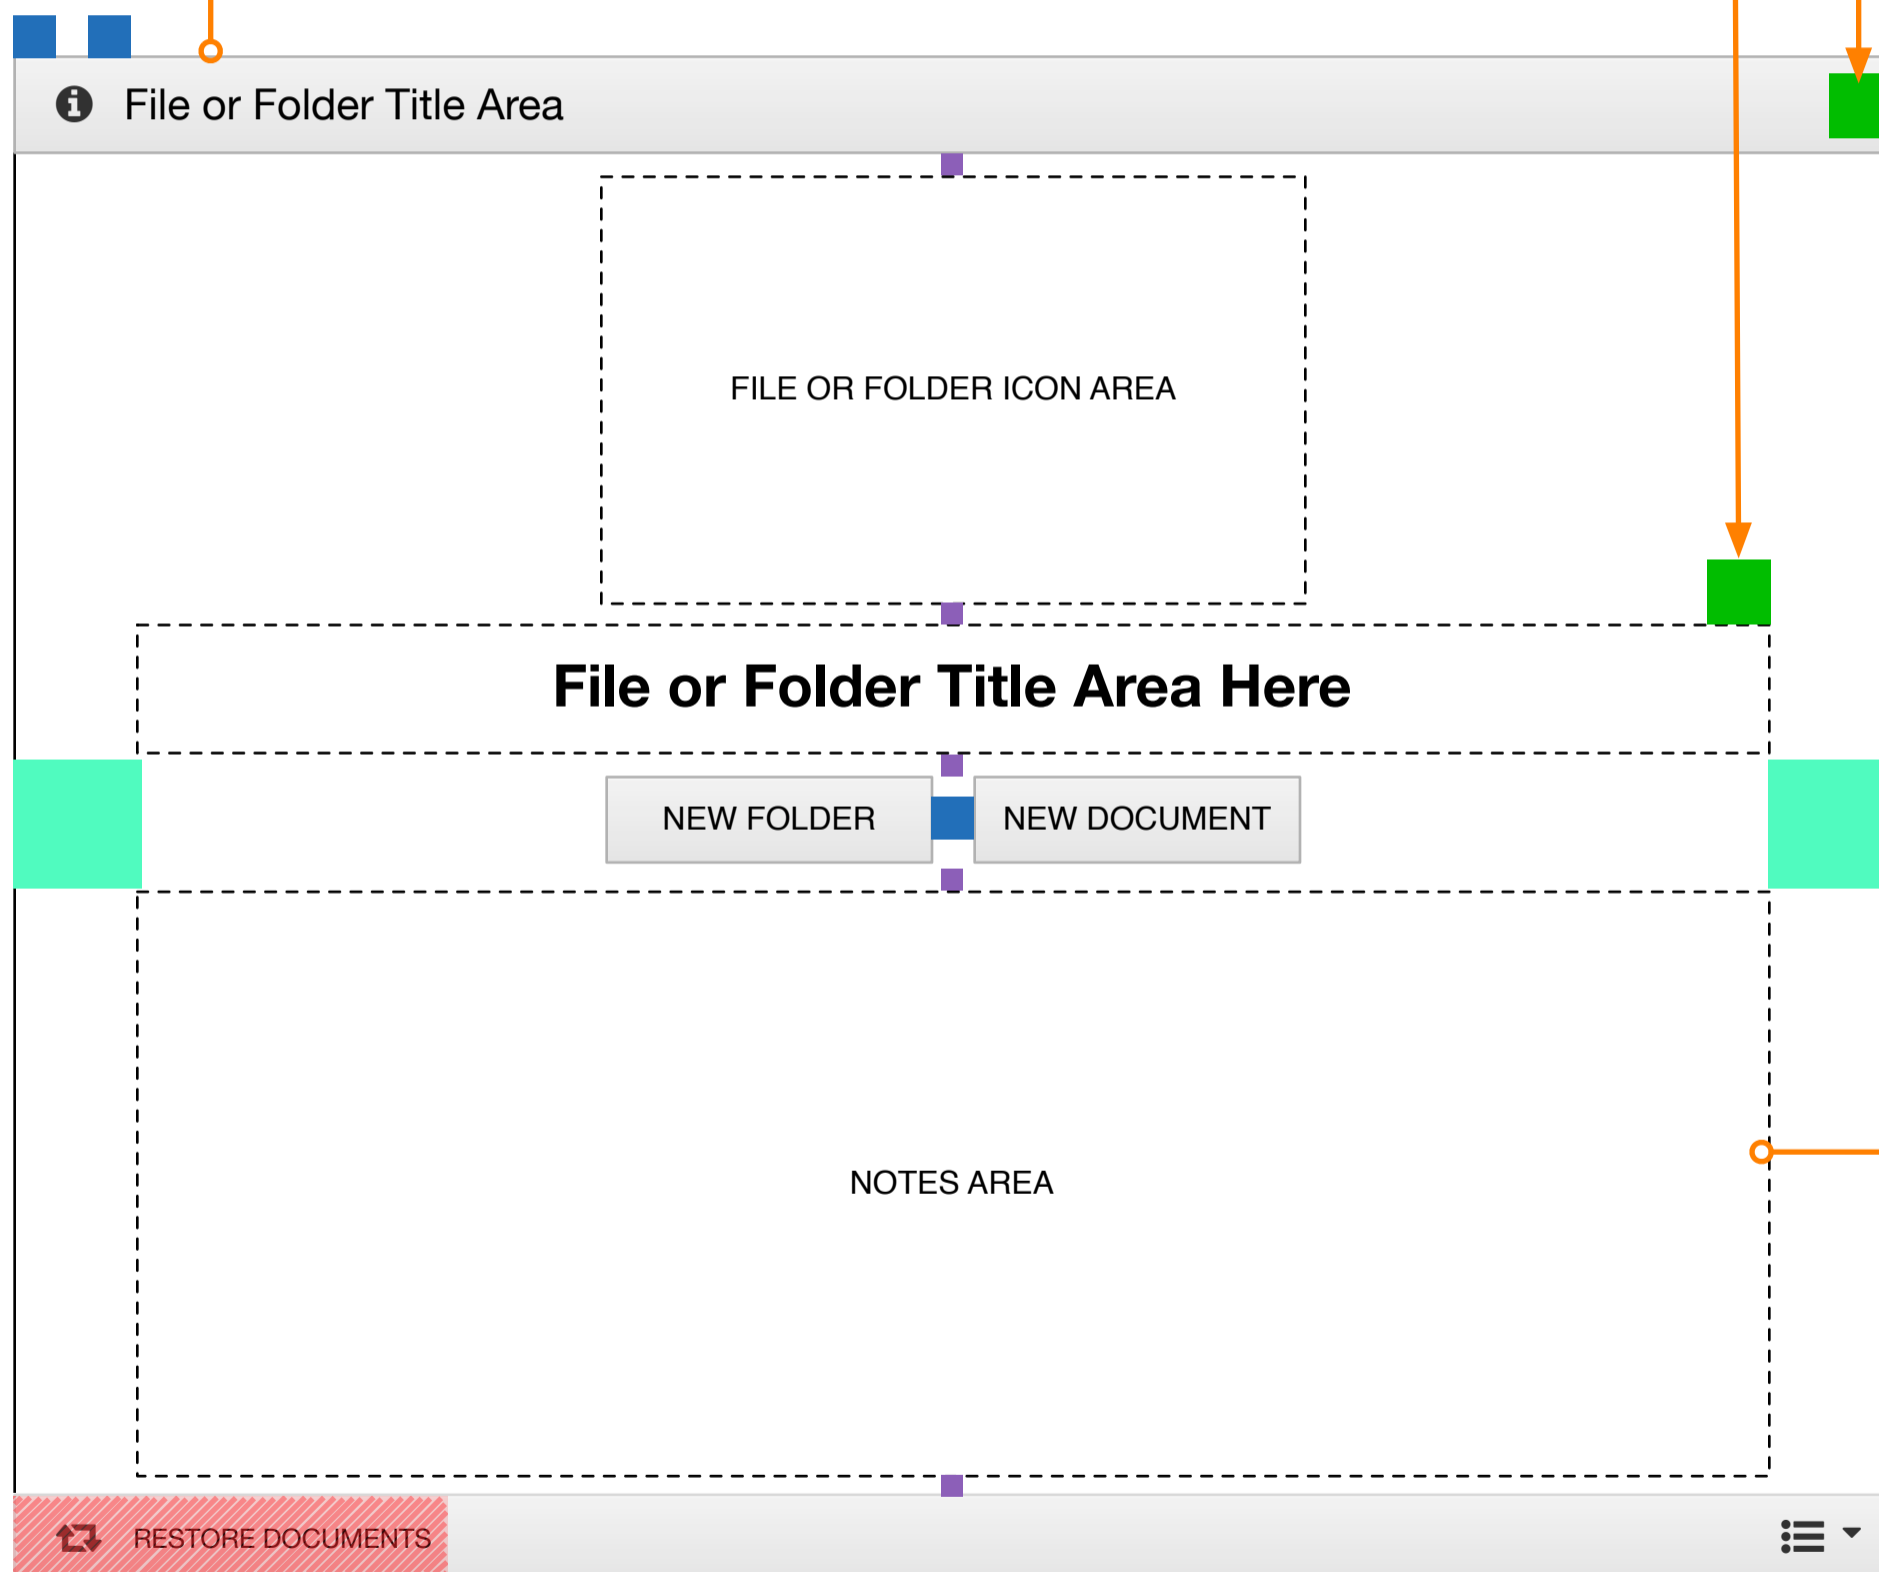

Ellipse area (if needed)  
When an ellipse is used a tooltip should be available to display any truncated text

File or Folder Title is right aligned

Height of these elements stay fixed

Height of Notes section adjust to fit the available screen real-estate

File or Folder Title Area Here

NEW FOLDER NEW DOCUMENT

NOTES AREA

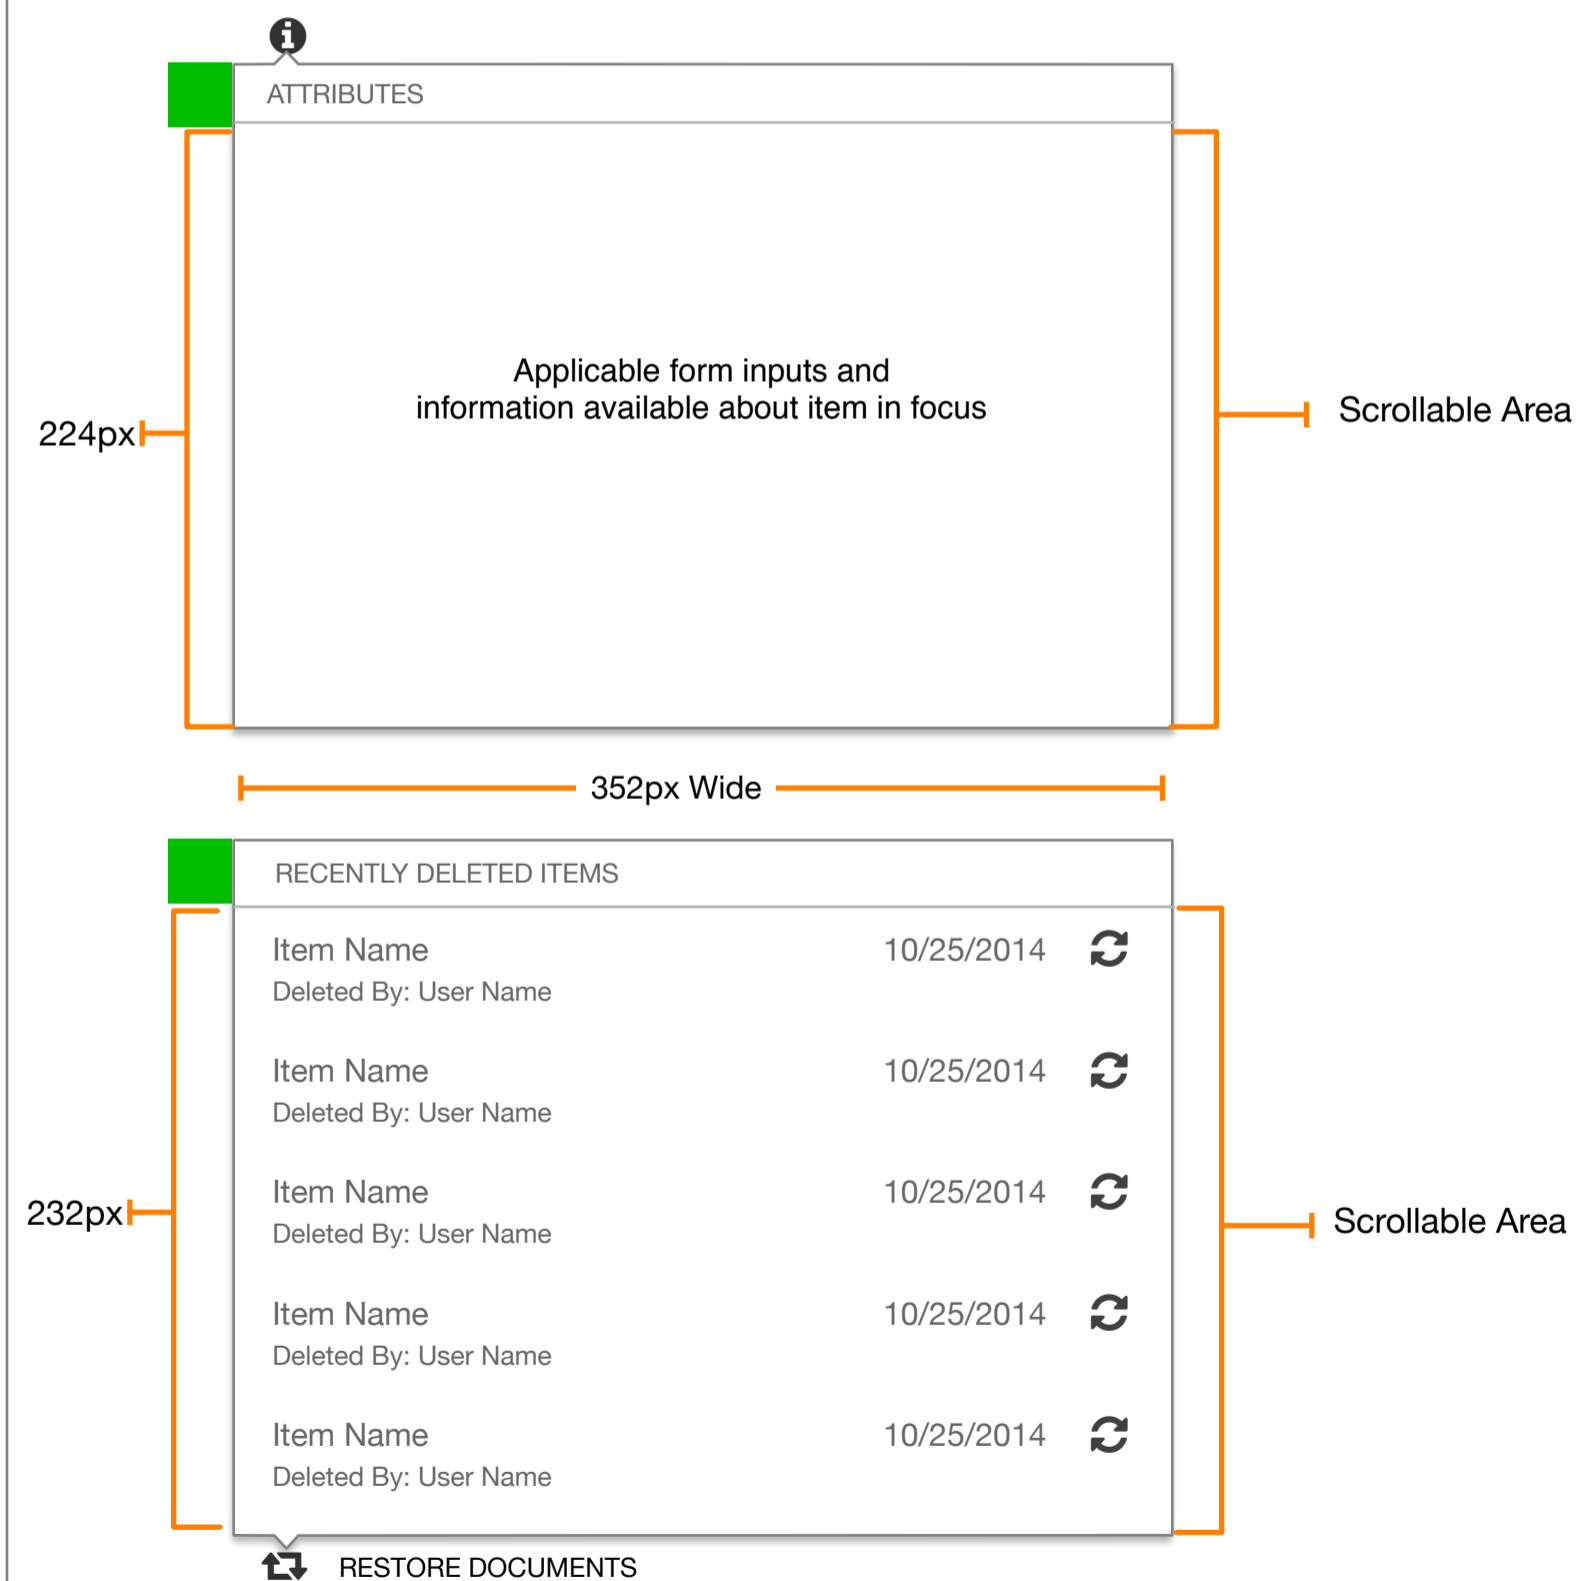

RESTORE DOCUMENTS

Width and height of Notes section adjust to fit the available screen real-estate  
\*See "Notes" Section for further description

Content contained in this area is center aligned with a 48px Margin on each side.

### MENU ITEMS

Clicking the icon toggles the respective menu open or closed. A click outside of an open menu closes the open menu

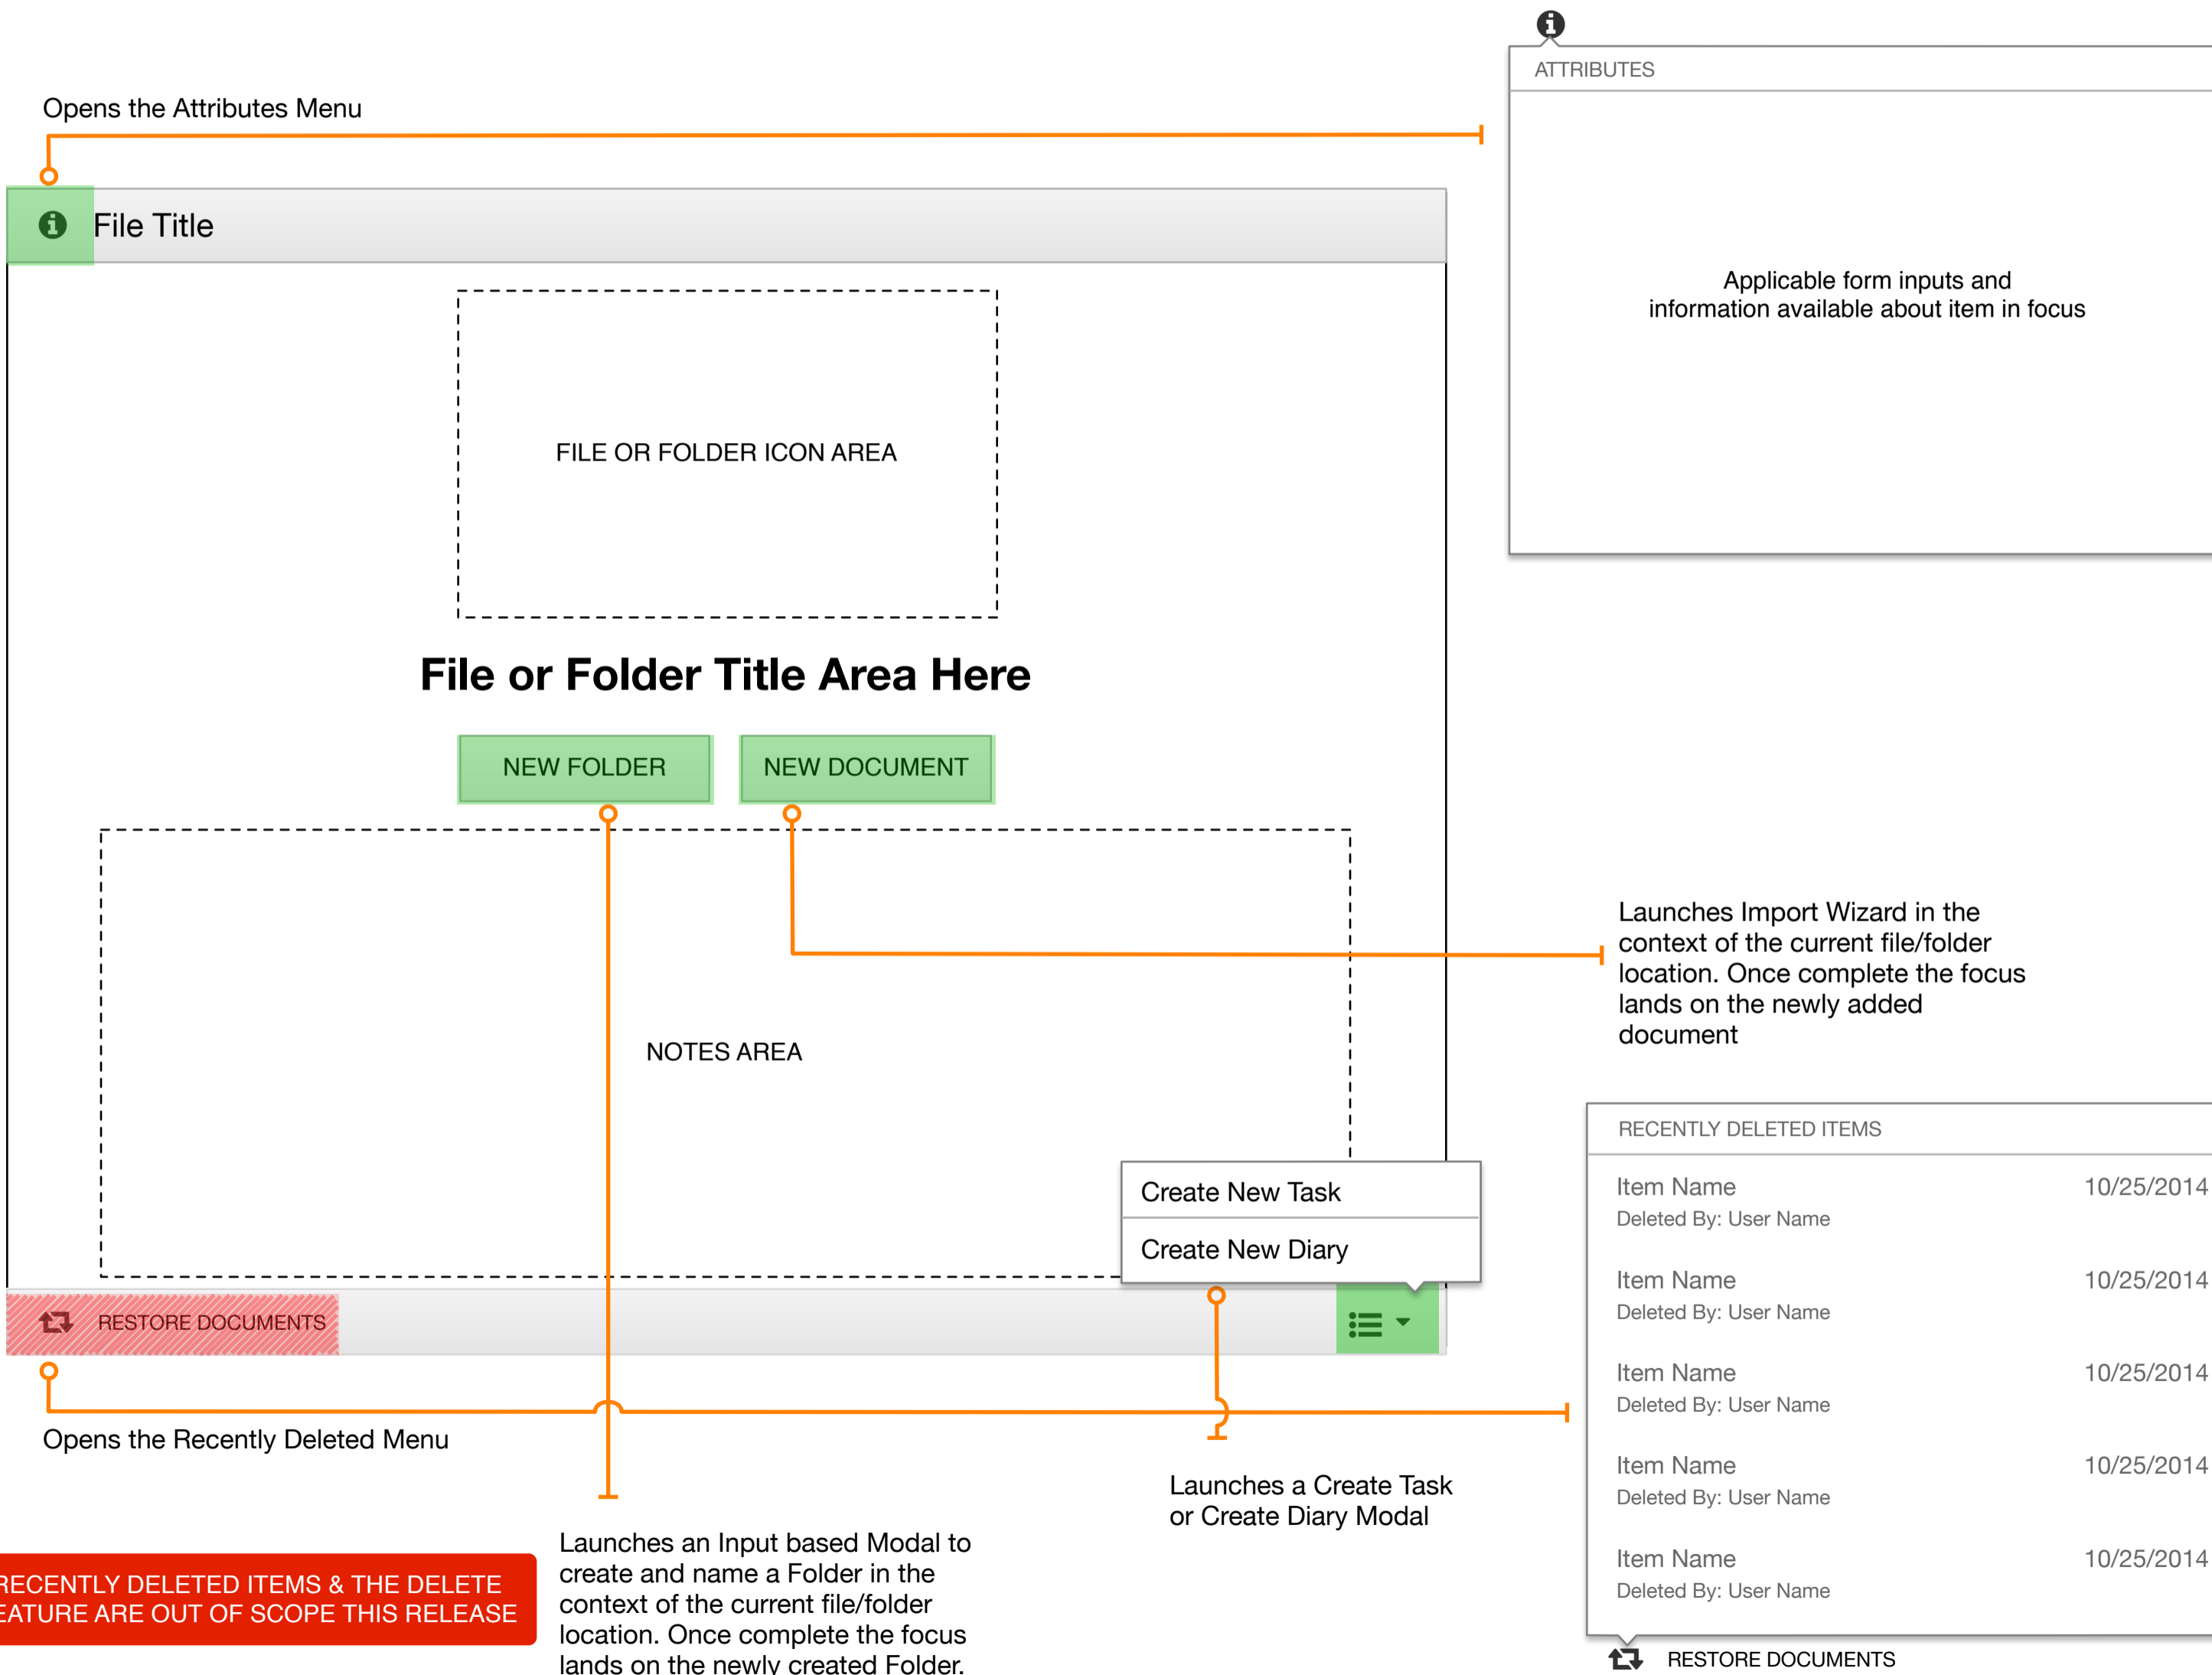

224px

232px

352px Wide

RECENTLY DELETED ITEMS & THE DELETE FEATURE ARE OUT OF SCOPE THIS RELEASE

## File & Folder Node ClickTargets & Keyboard Interactions

### Keyboard Interactions

Ctrl + I Show/Hide Attributes

Ctrl + N Add Note

Ctrl + D New Document

Ctrl + F New Folder

Ctrl + R Restore Documents

## Notes Click Targets and Interactions

### CLICK TARGET

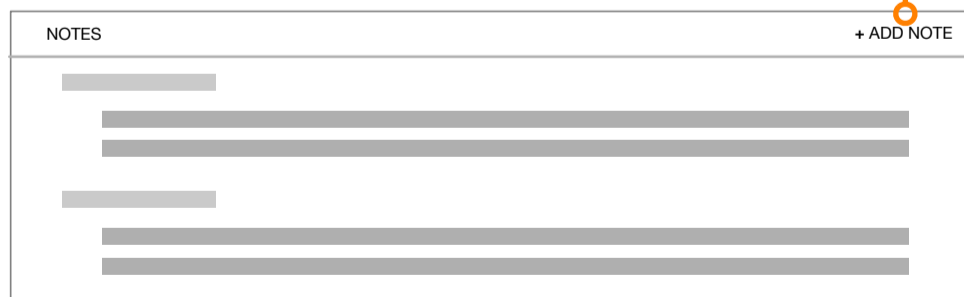

Launches a modal to capture input text

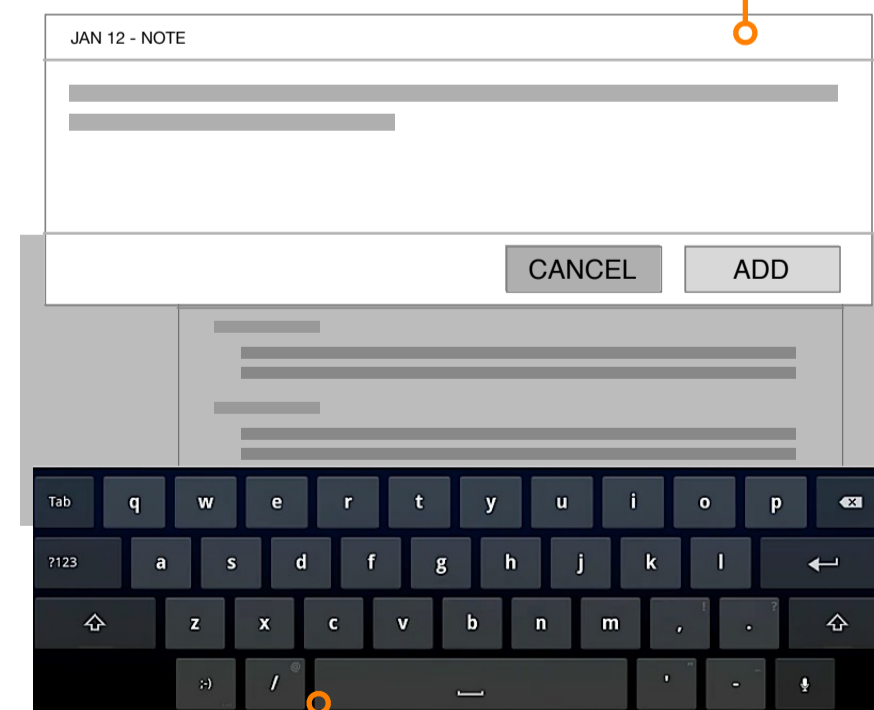

### ADD NOTE SEQUENCE

**\*All animations should have an ease in and ease out**

User selects "ADD NOTE"

Modal fades in 300ms

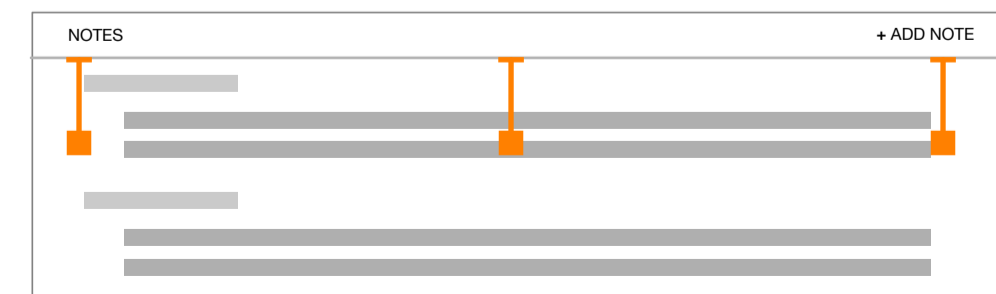

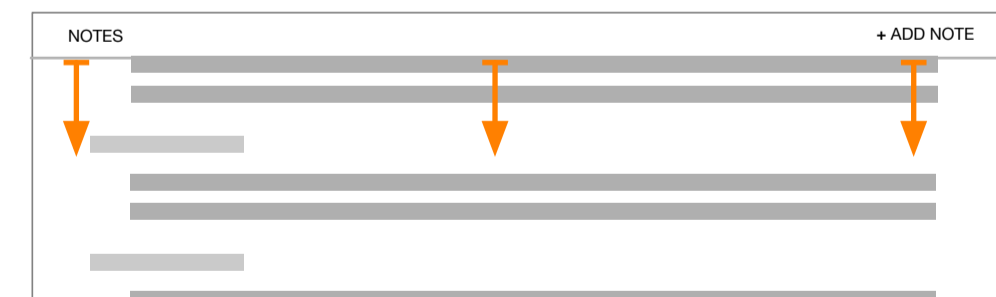

User inputs note text into modal

Touch device may evoke onscreen keyboard

Modal fades out 300ms

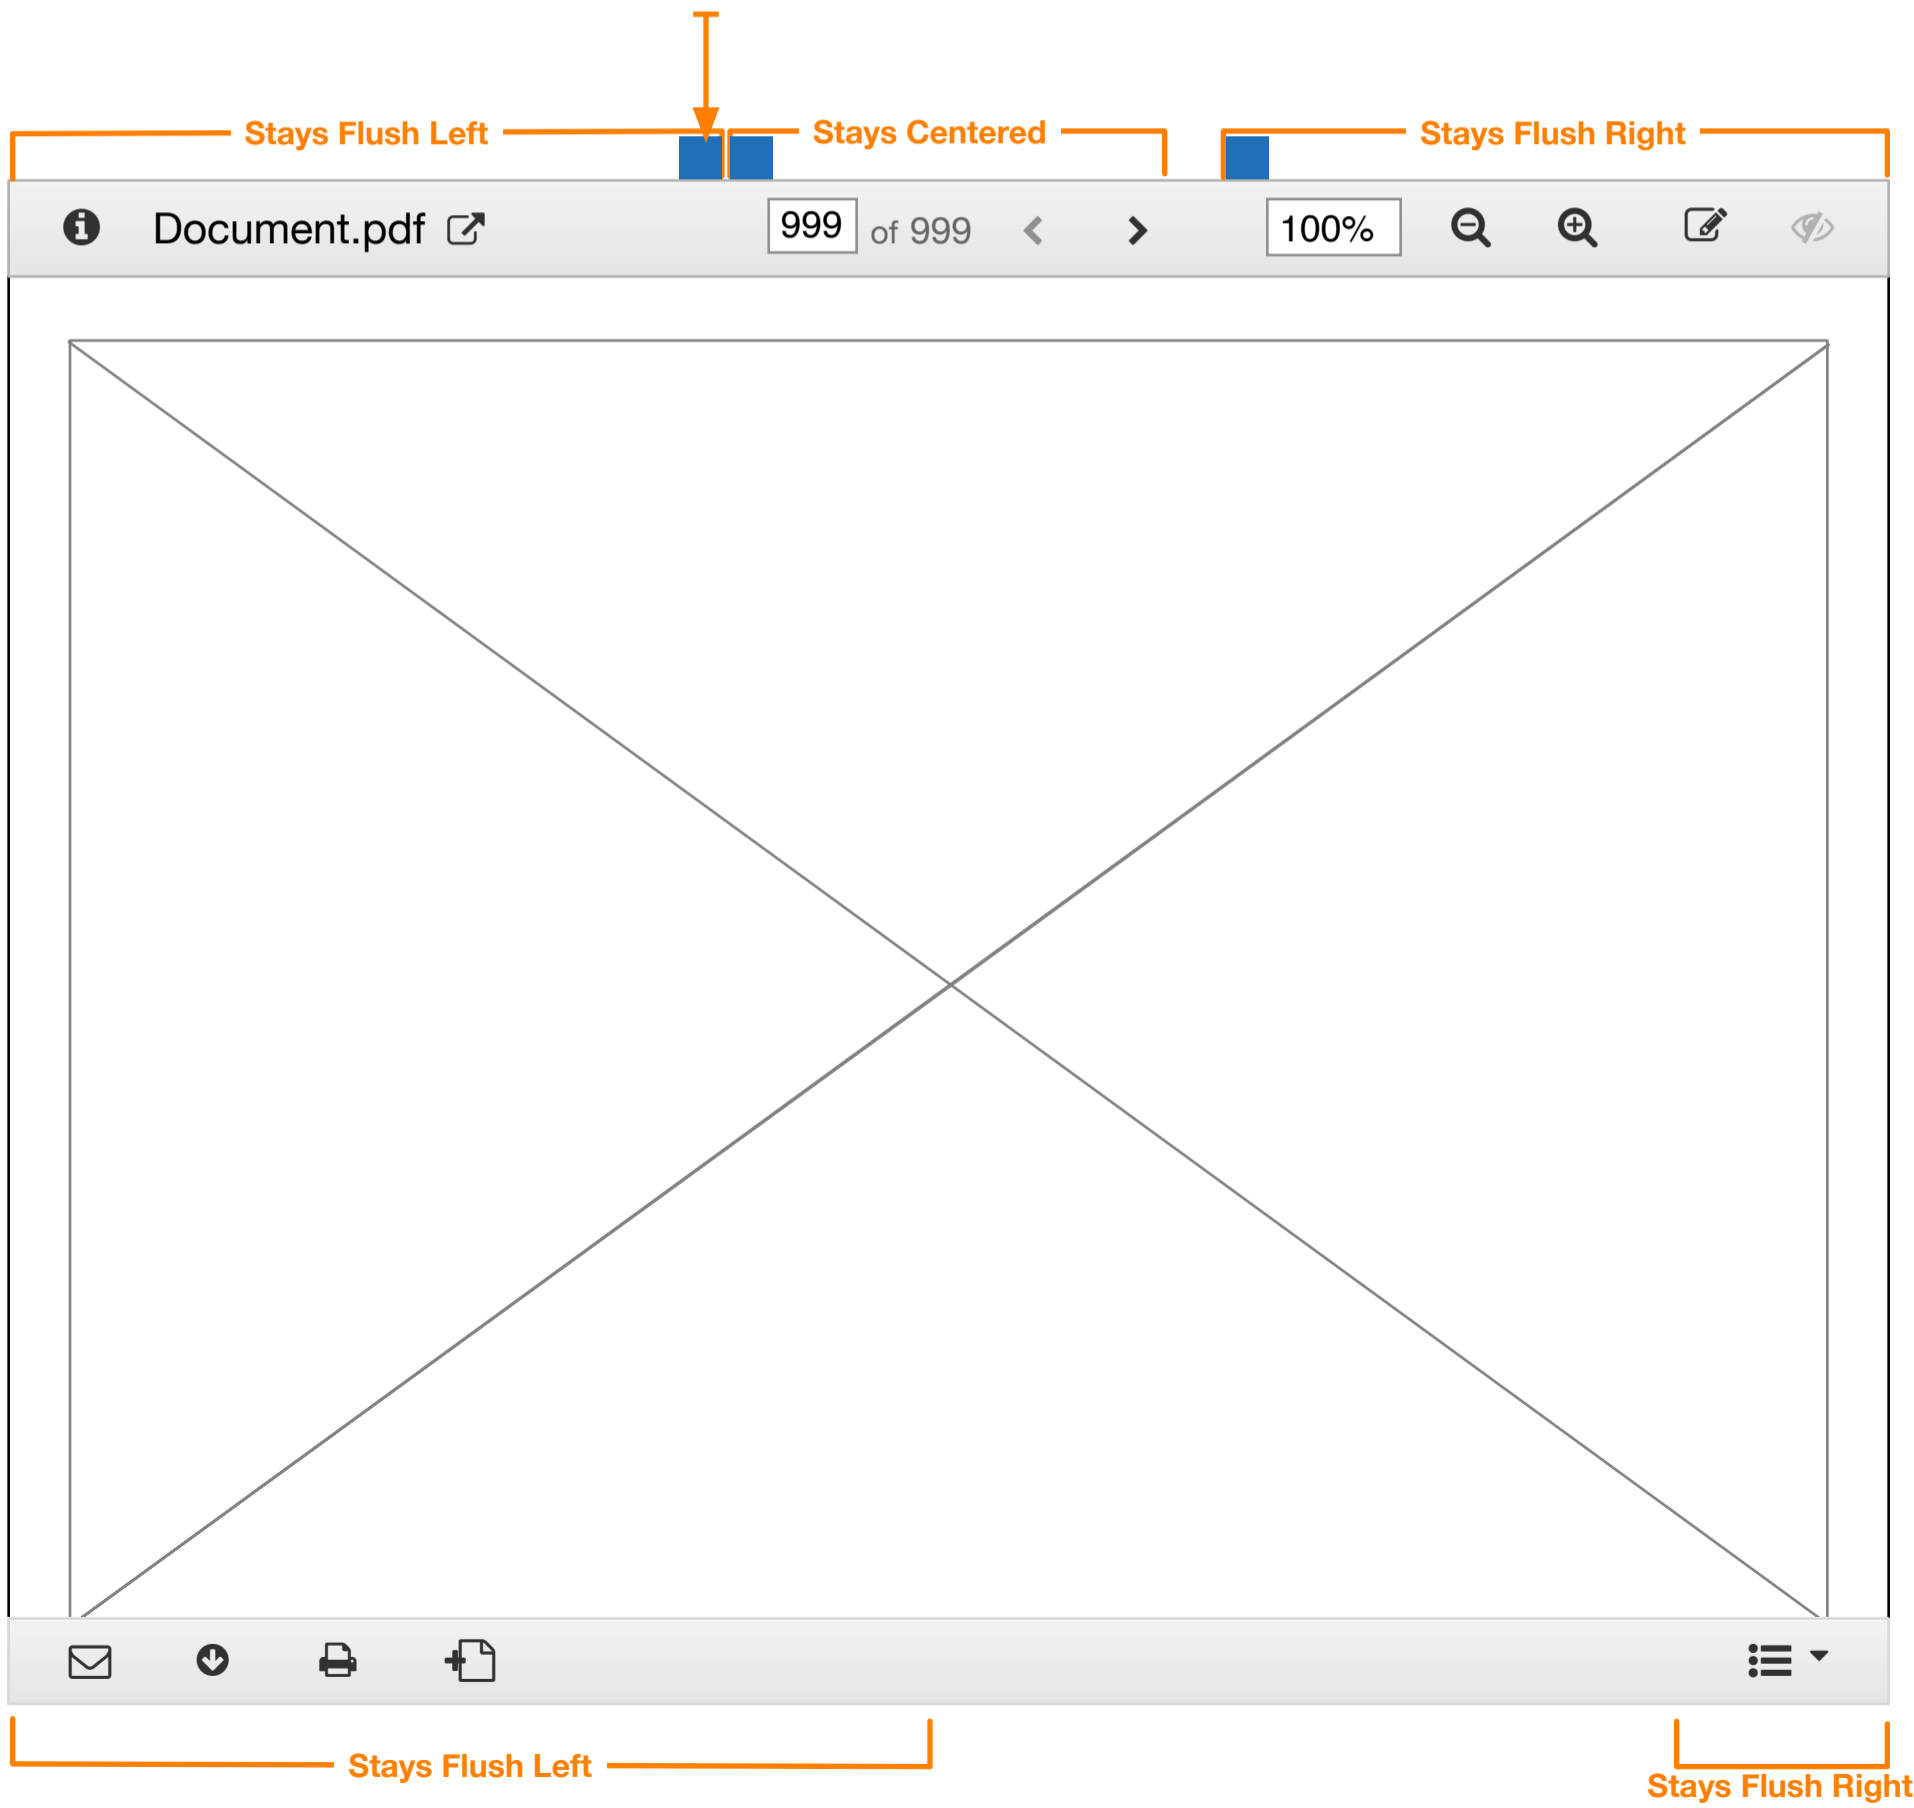

New note slides down from under the Note Menu 500ms

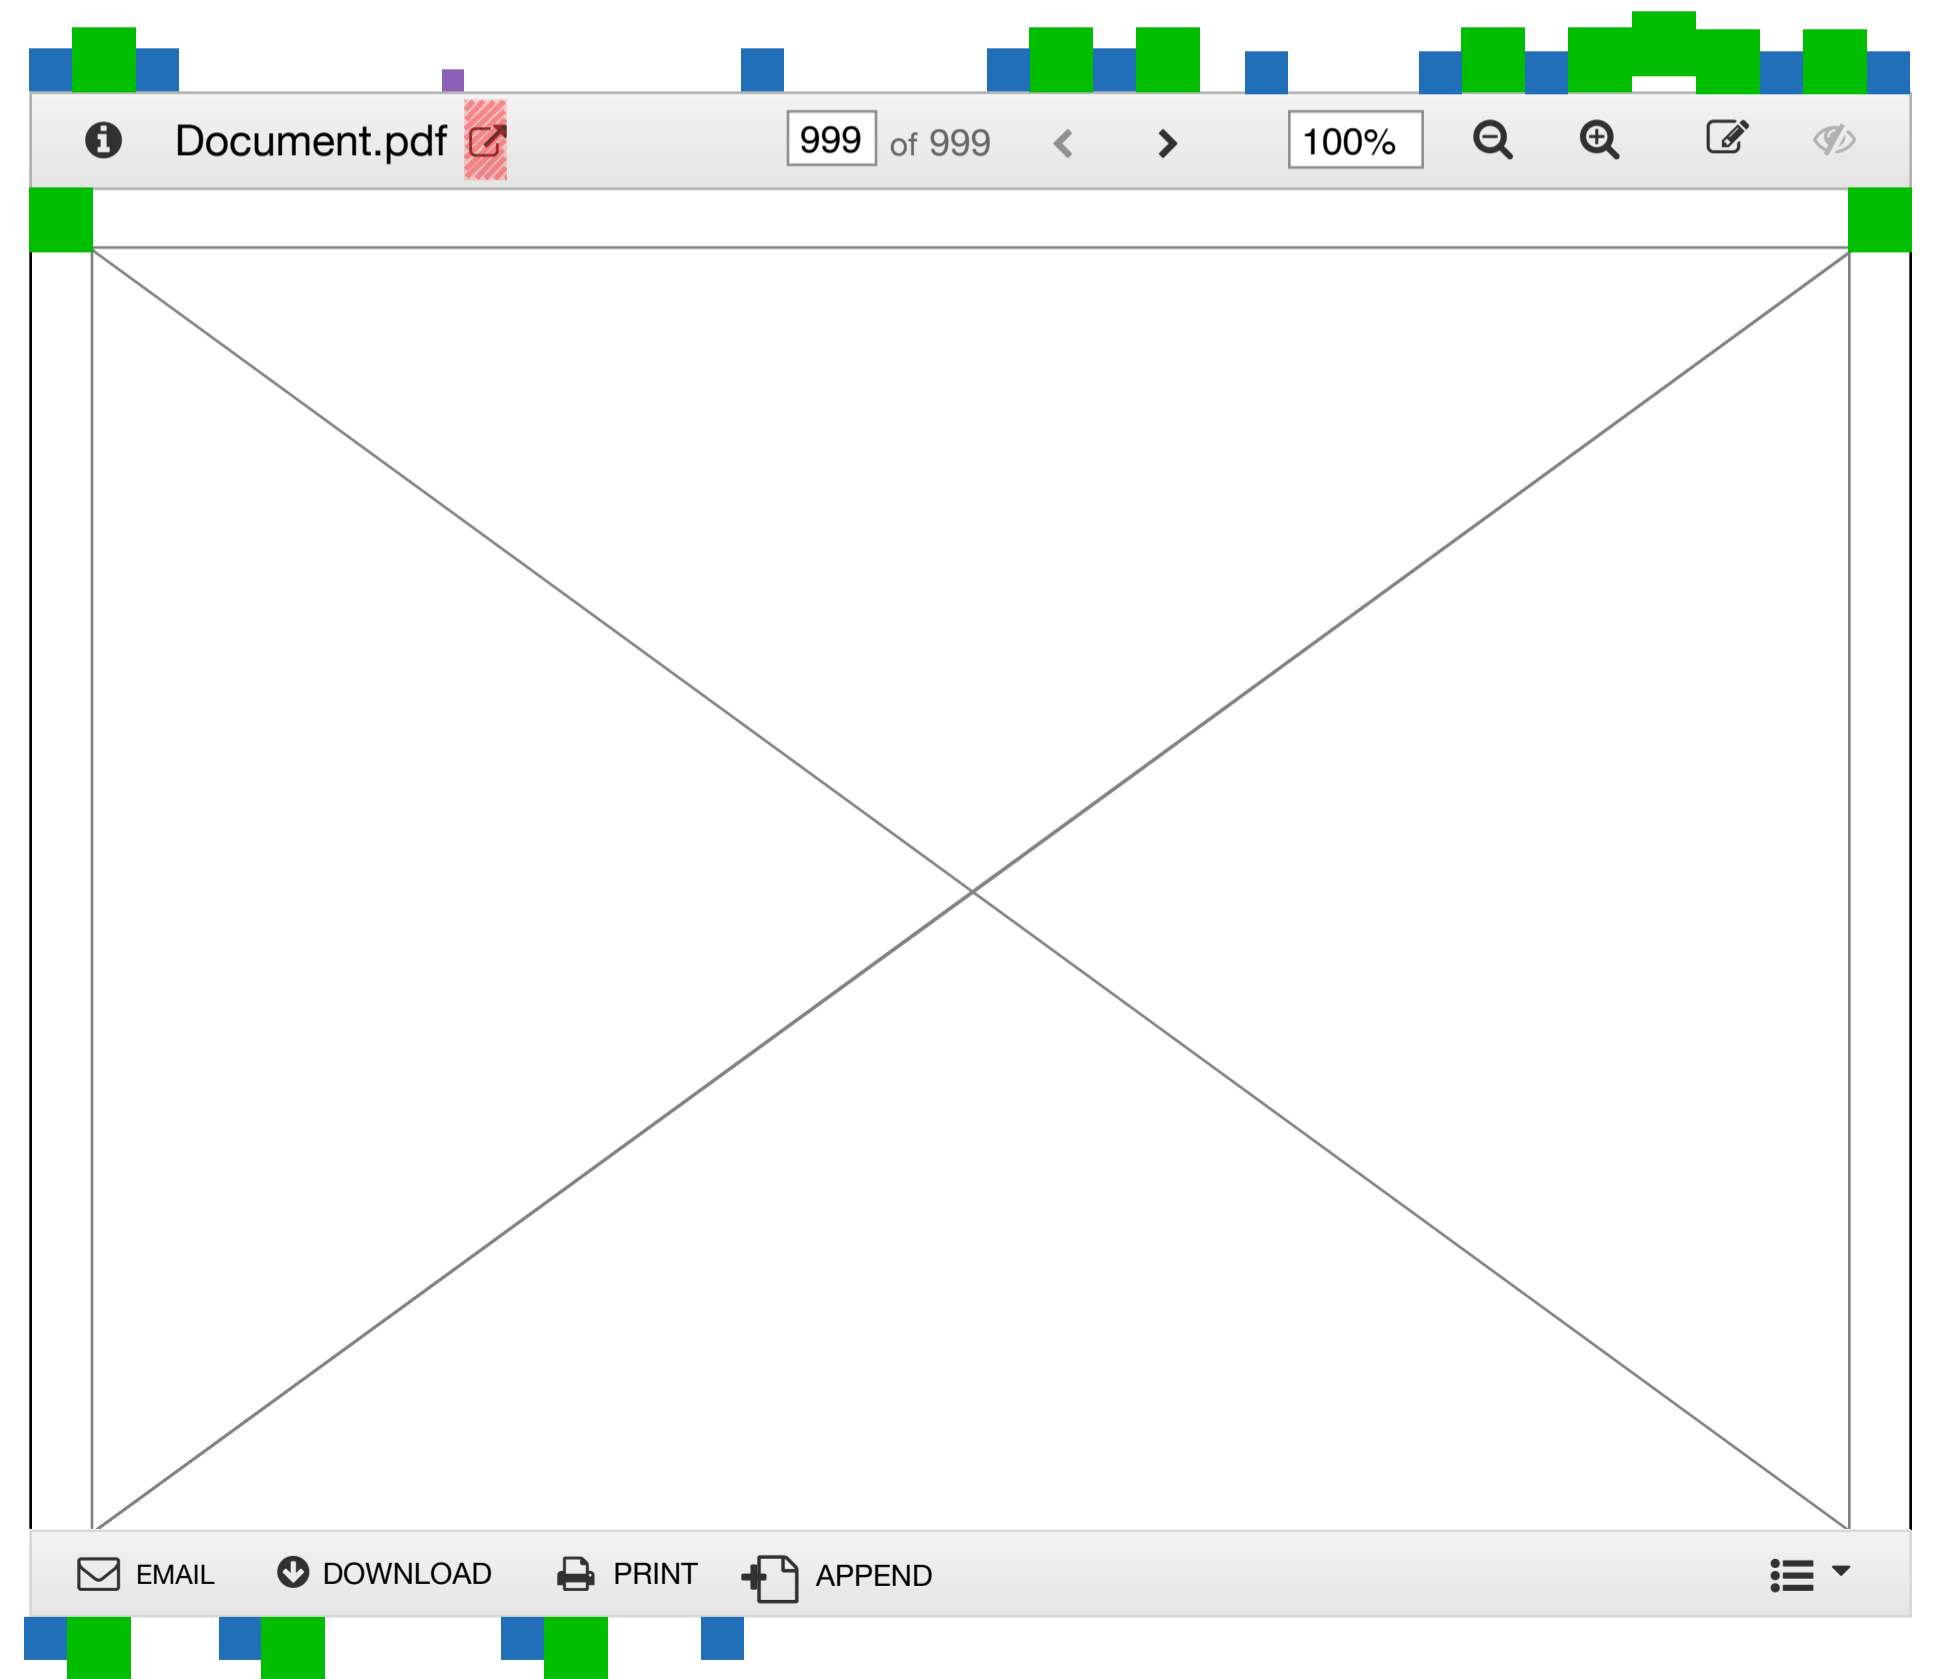

## Document Node Anatomy & Construction

Ellipse area (if needed)  
When an ellipse is used a  
tooltip should be available to  
display any truncated text

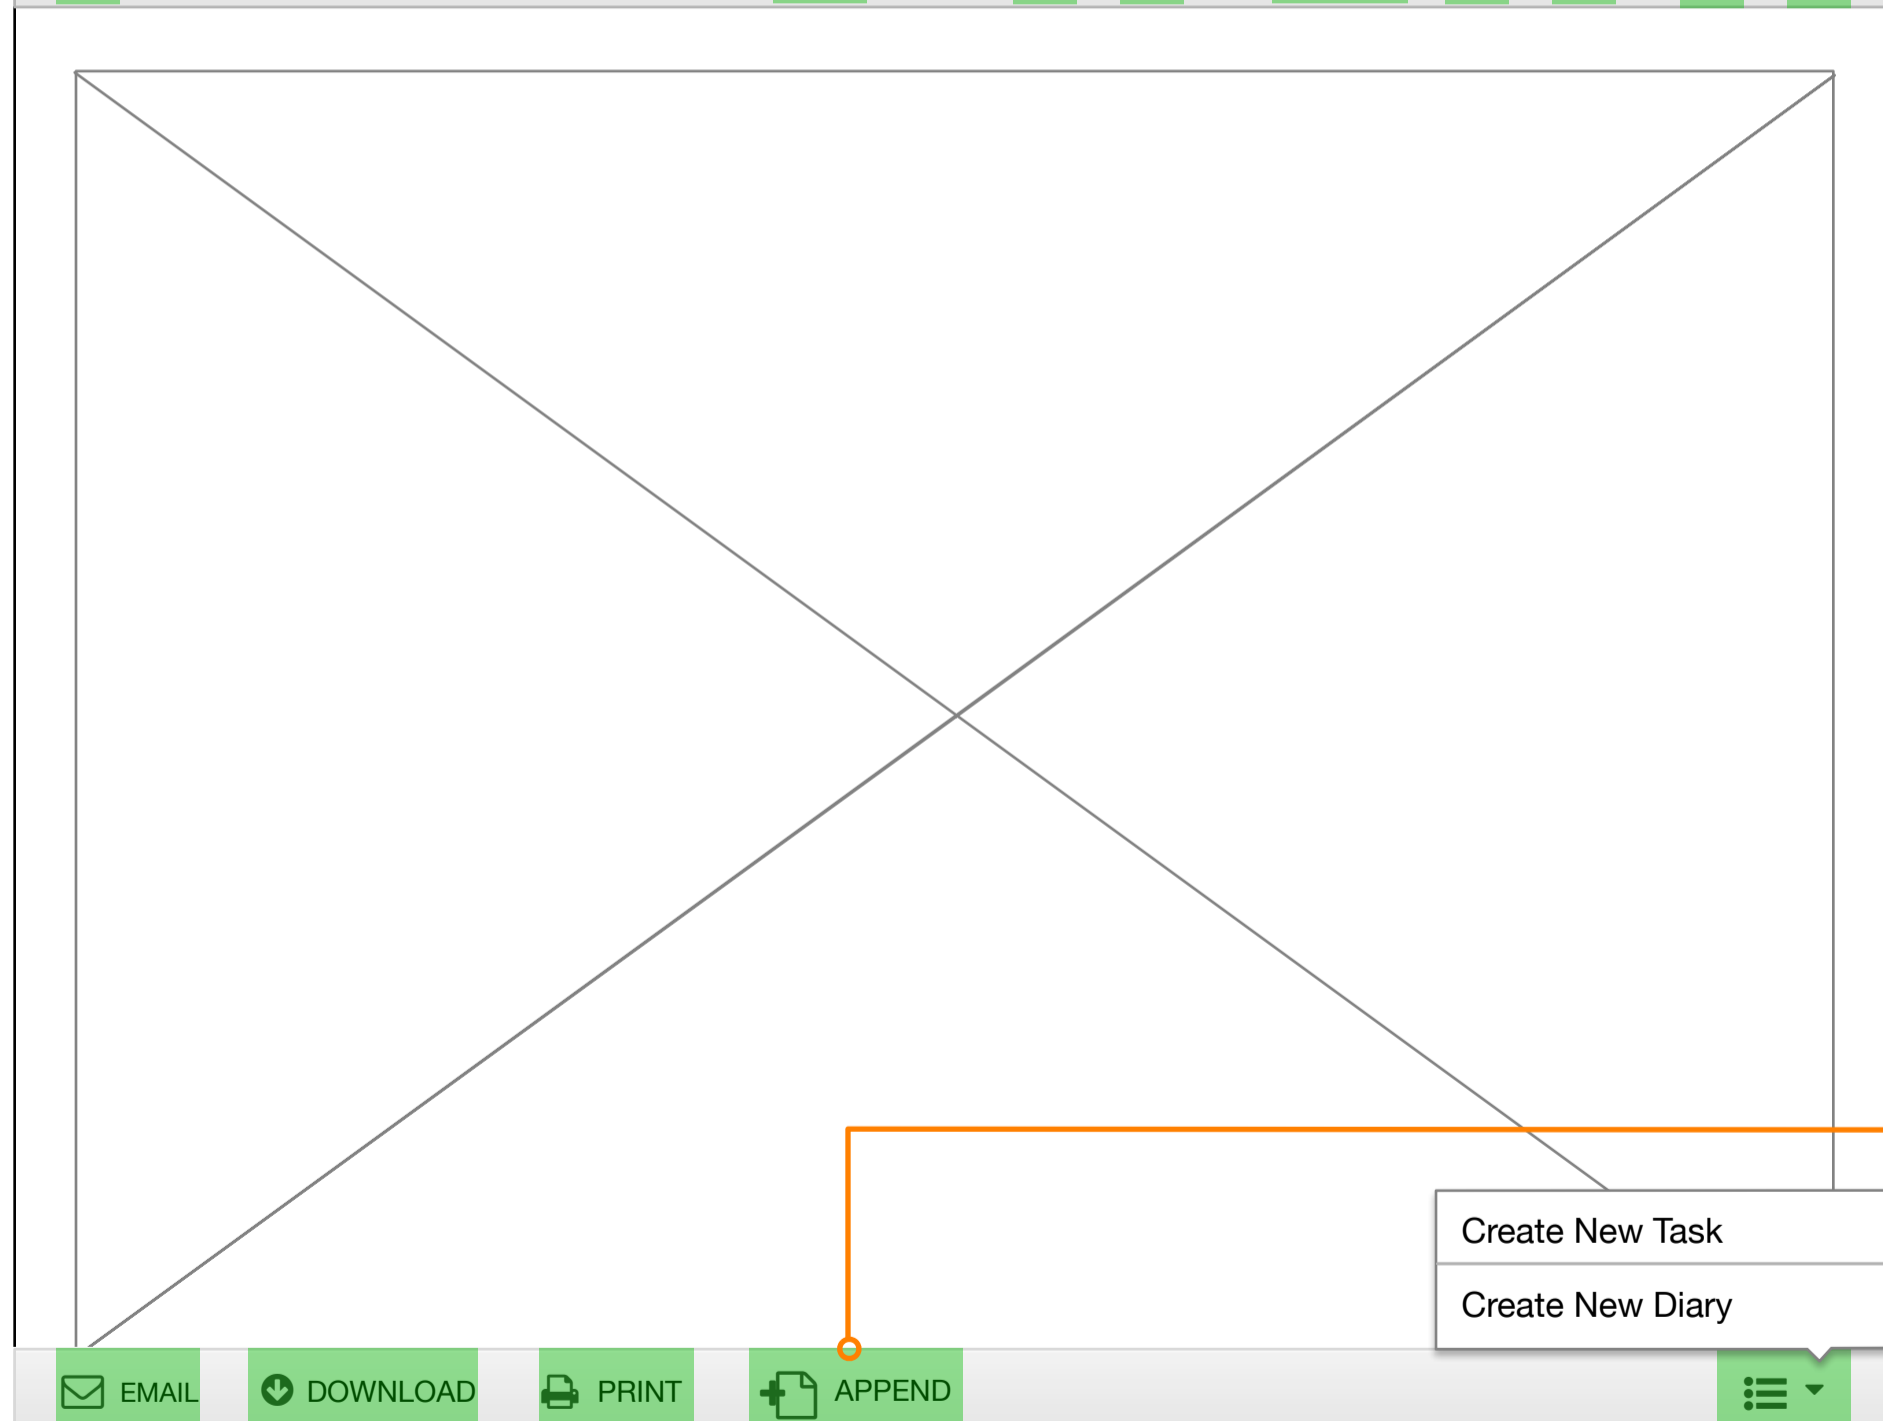

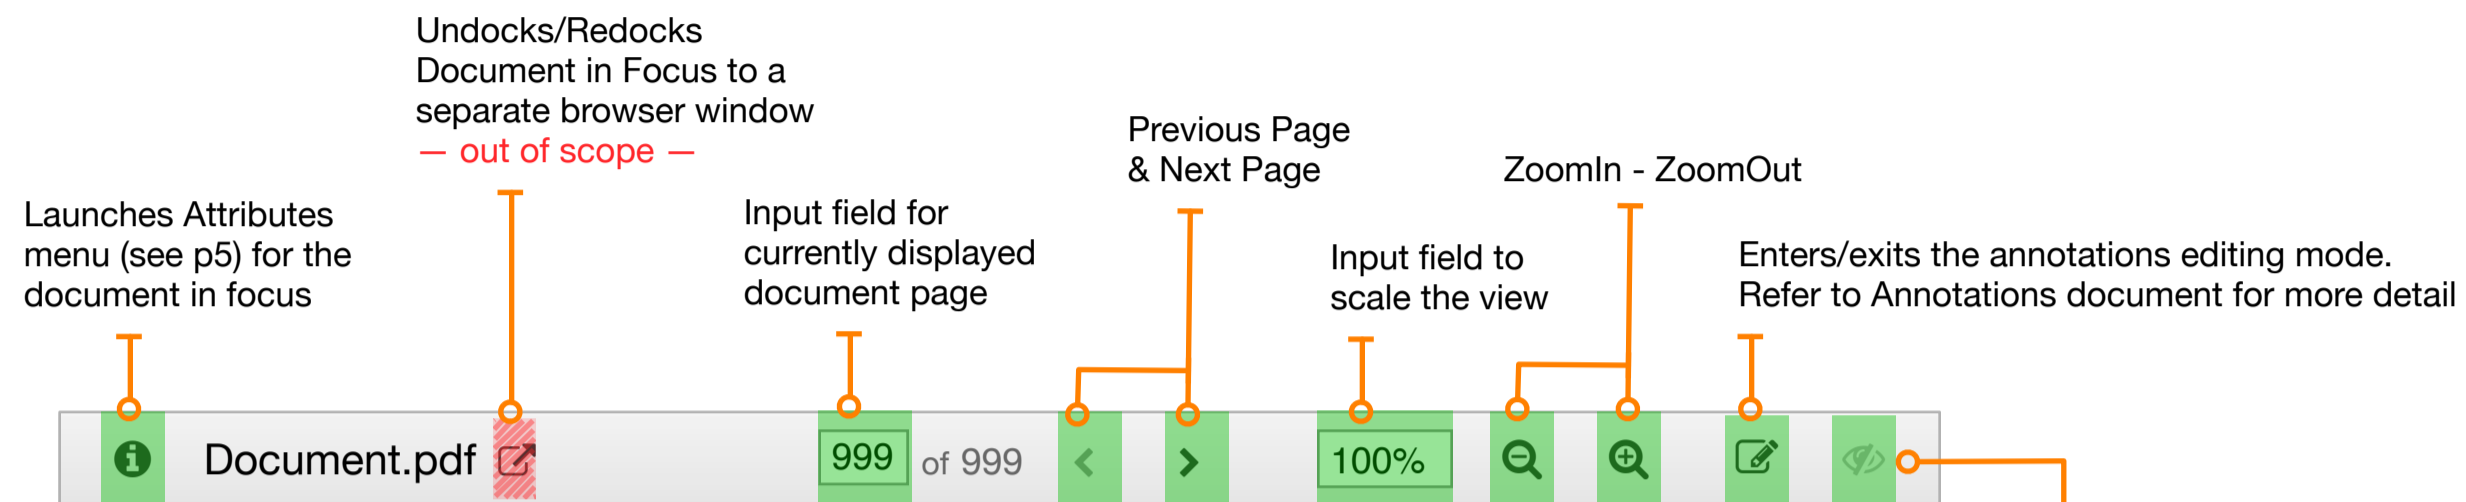

Out of Scope

32px 24px 16px 8px

## Document Page Node Click Targets

Toggles show/hide annotations if they are available. Disabled if there are none

Input Modal to allow the user to choose where to add additional pages

Launches Import Wizard. User selects document to attach

Create New Task  
Create New Diary

Launches a Create Task or Create Diary Modal

Launches a input Modal to allow the user to isolate the parts of the document the action will apply to

### Append Document

Select where to add addition pages to this document

- Beginning of the document
- End of the document

CANCEL APPEND TO BEGINNING

### Referring Action (ex: Download)

Select the pages and features you would like to include

- Entire Document 56p - 5.6MB
- Specific Pages   
ex: 1, 5, 10-15, 37, 55
- With Annotations

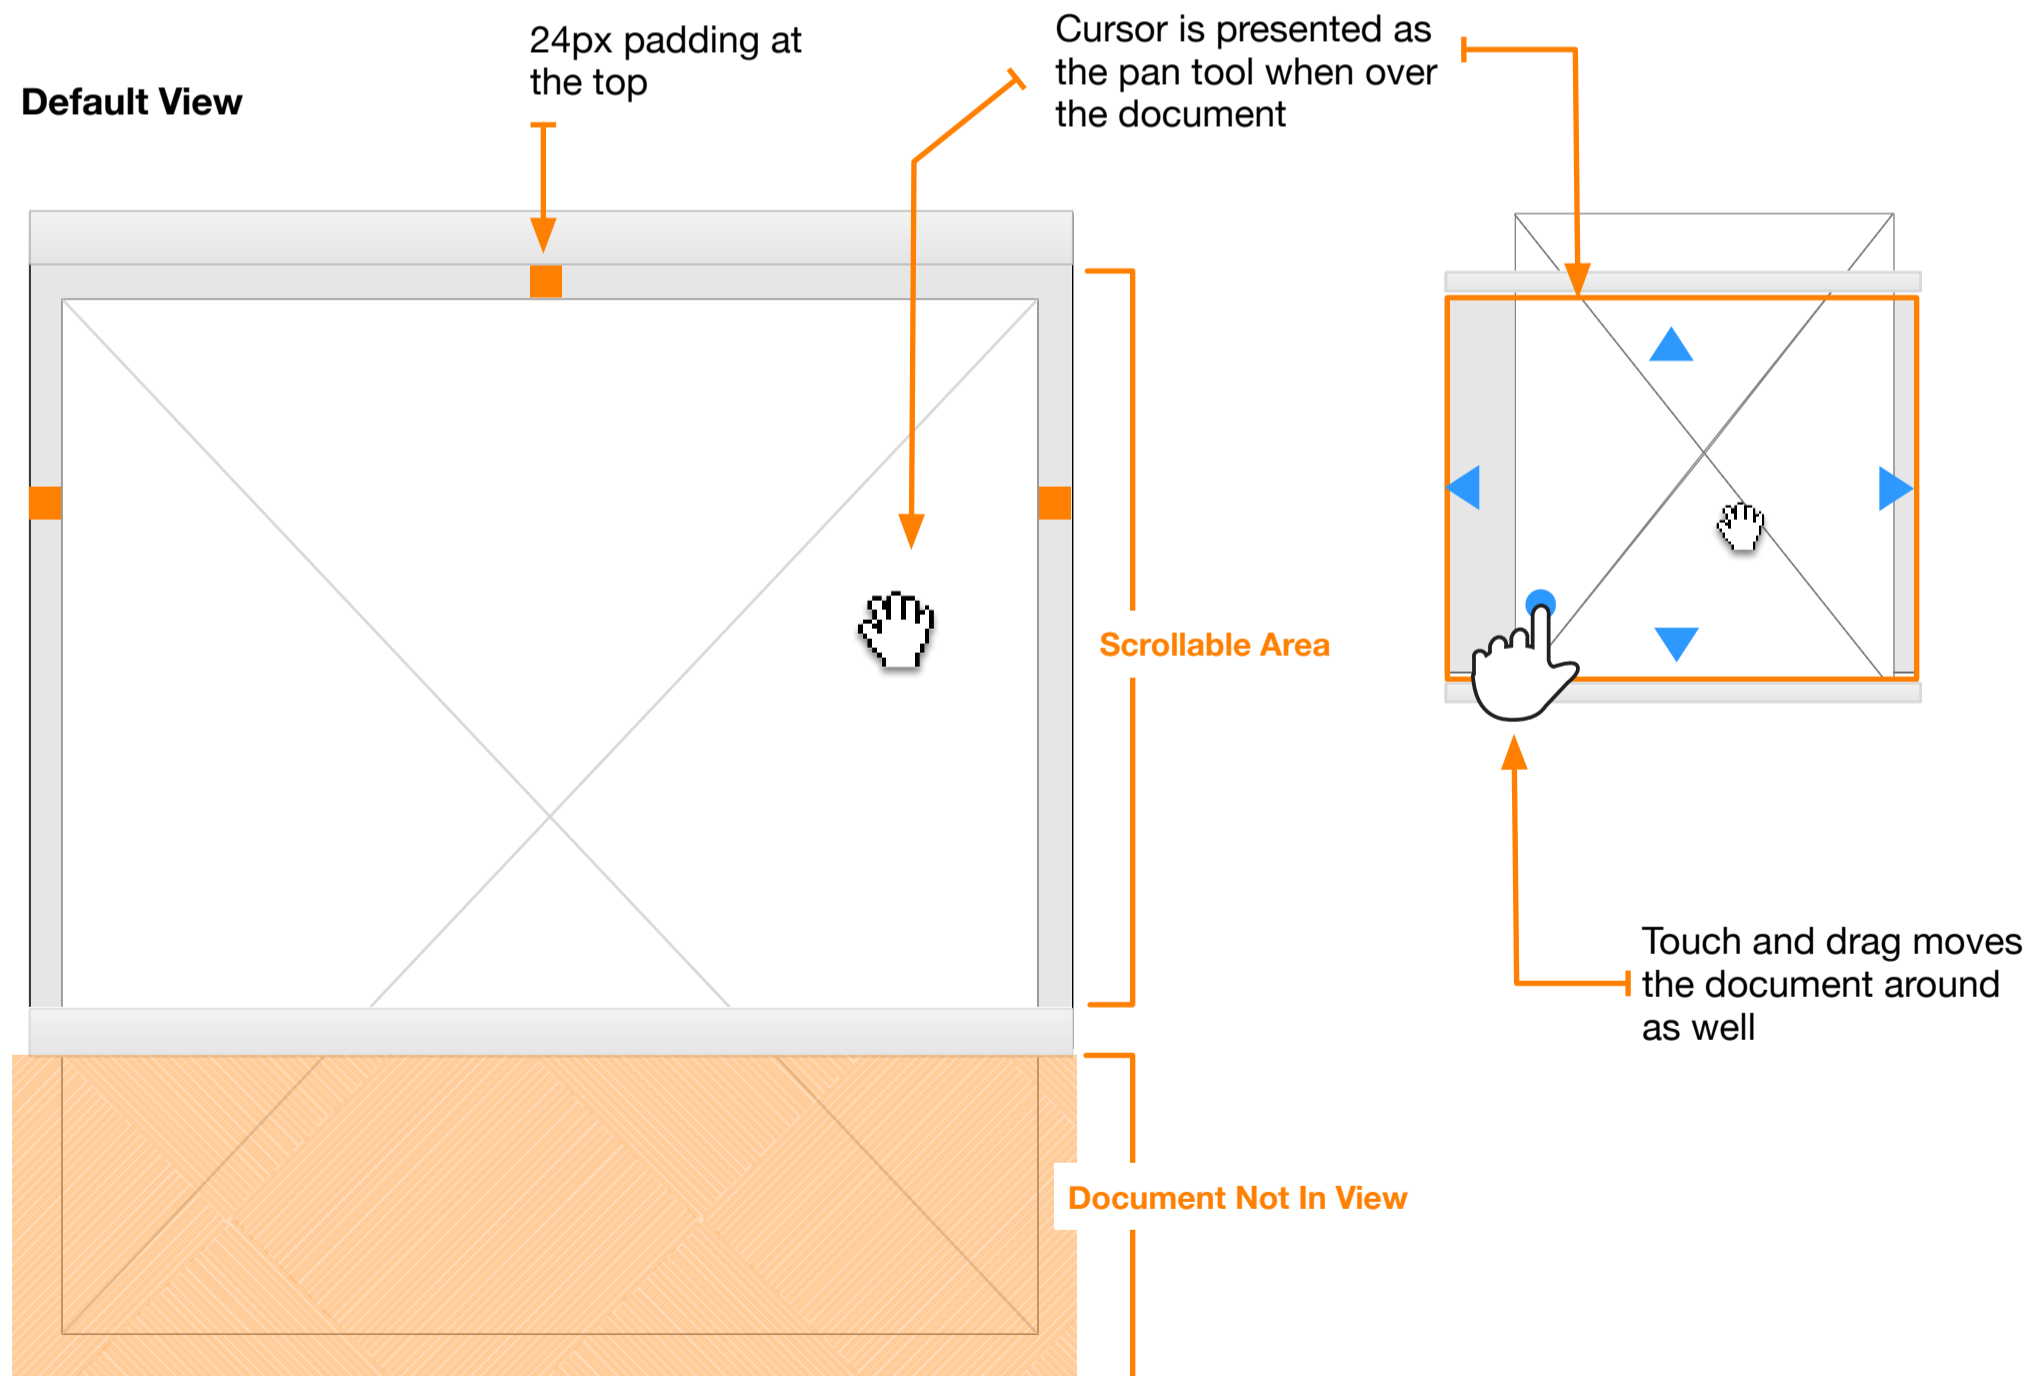

CANCEL NEXT

## Document Node Presentation & Manipulation

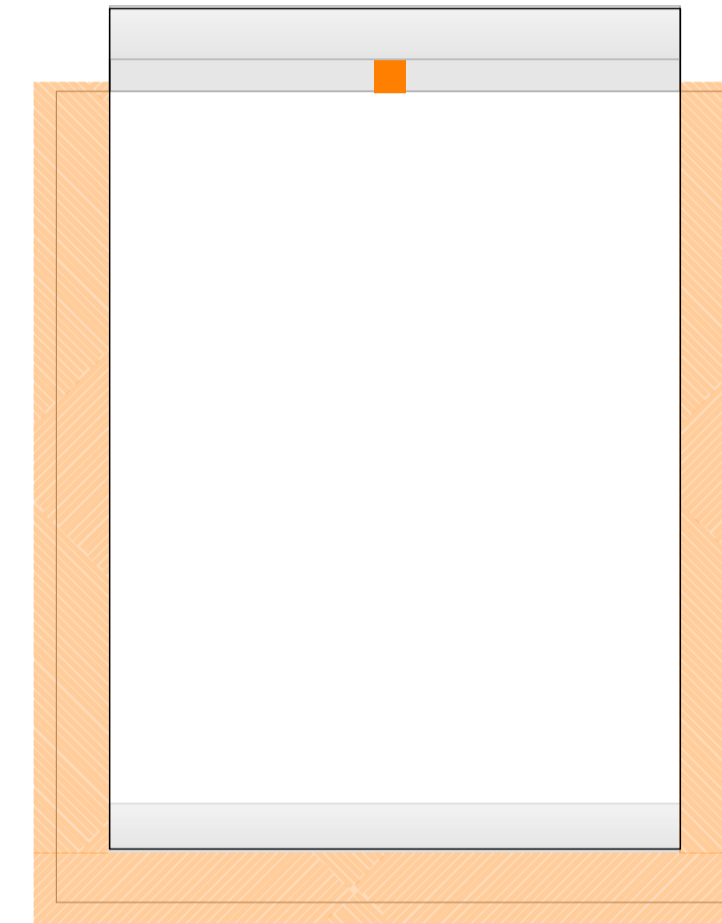

Upon entering a document, the image should be presented at 100% of the available width. The document can scroll under the toolbar but initially is positioned with a 24px padding between the top of the document and the tool bar. If possible include a 24px padding on the right and left of the document. The user can scroll, drag, or use directional keys to view the rest of the document.

The goal being to show as much of the document at a readable size as possible initially vs showing more of a thumbnail version that is unreadable.

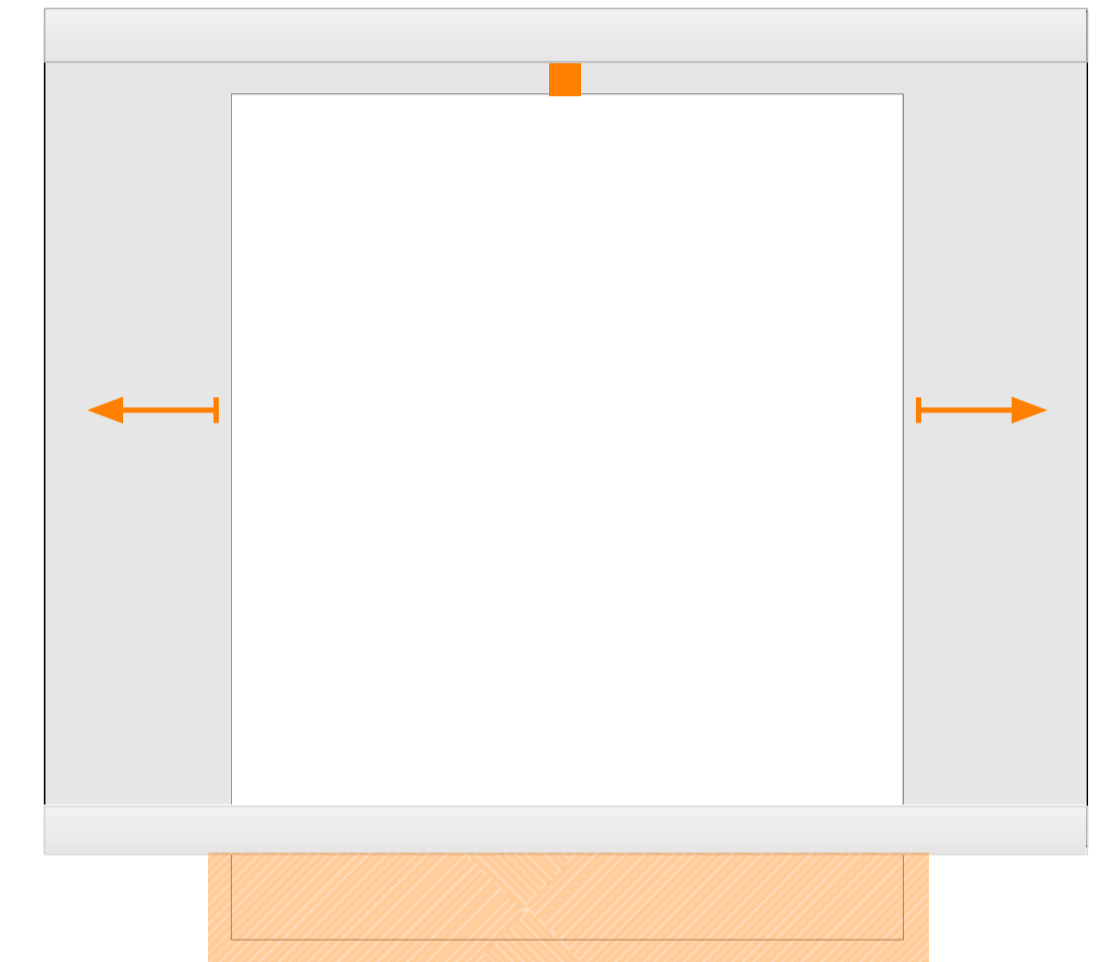

### EXAMPLE 1

Very Narrow Width

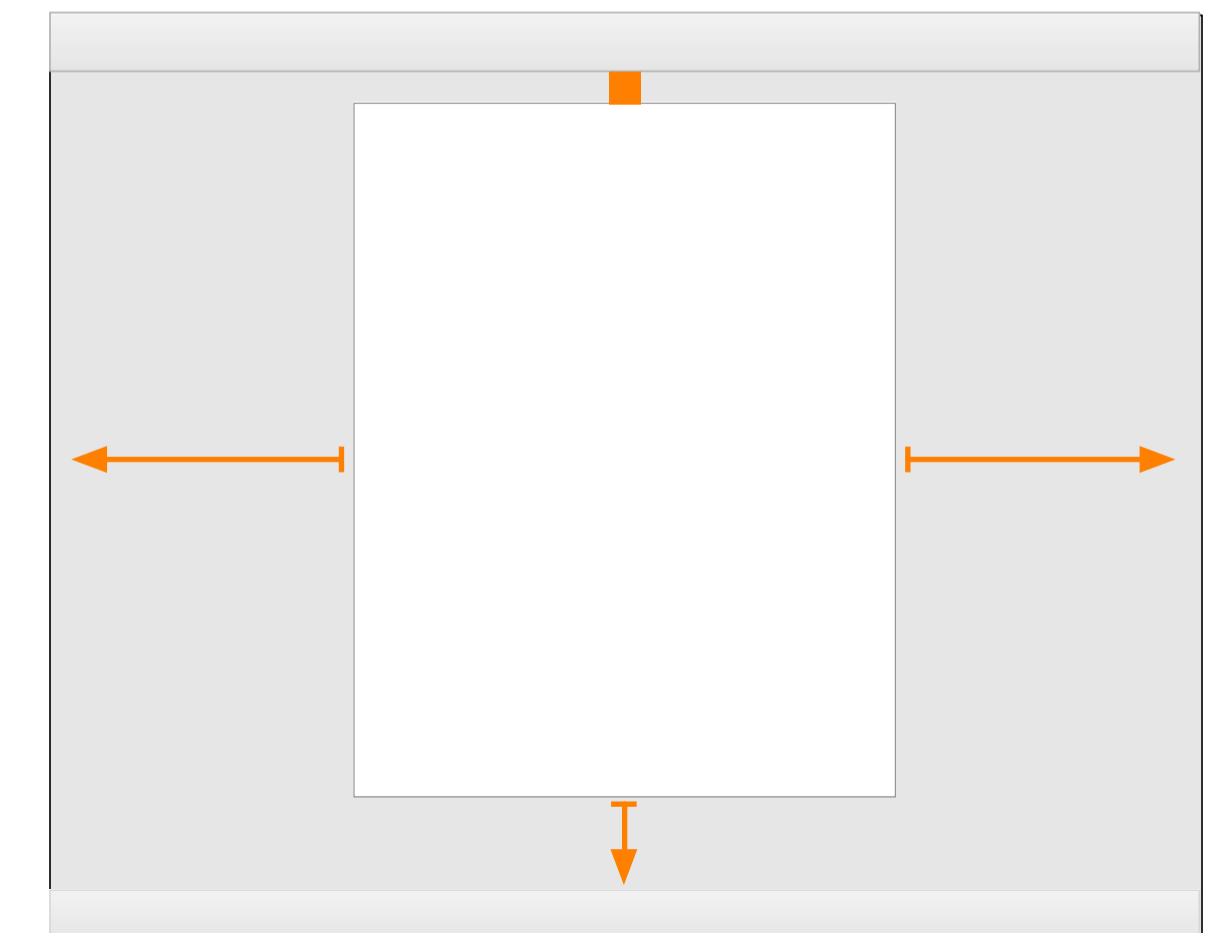

### EXAMPLE 2

Width may have extra padding initially

### EXAMPLE 3

Rare case where a document fits 100% within the entire screen

## Document Node Keyboard Interactions & Gestures

### KEYBOARD INTERACTIONS

Ctrl + = Zoom In

Ctrl + - Zoom Out

Ctrl + { Enter/Exit Annotation Mode

Ctrl + } Show/Hide Annotations

Ctrl + \ Dock/Undock

Ctrl + W Download

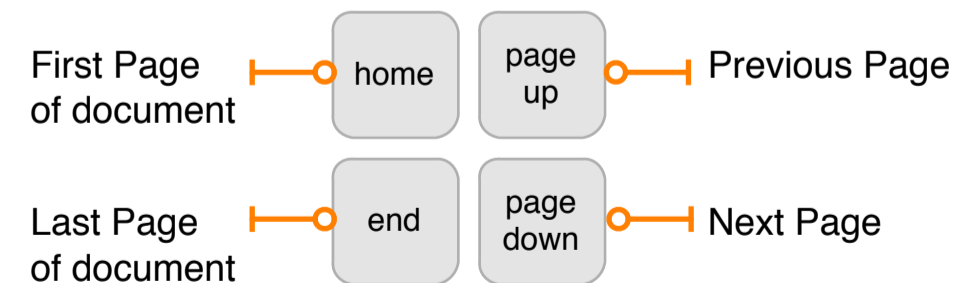

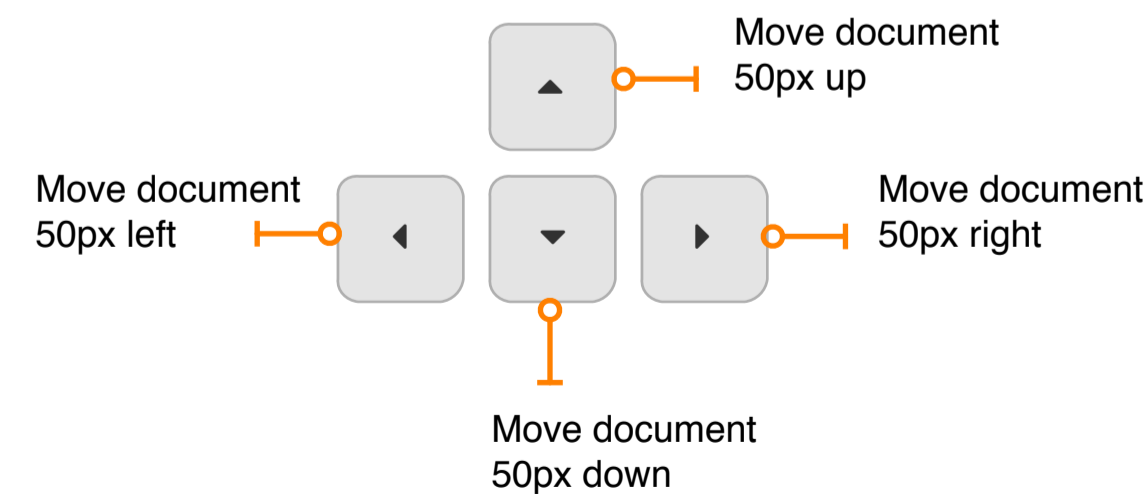

Ctrl + E Email

Ctrl + P Print

Ctrl + I Show/Hide Attributes

Ctrl + > . Puts focus on page input field  
1 of 999

Ctrl + ! 1 Closes the file in focus

### TOUCH GESTURES

Pinch = Zoom Out

Spread = Zoom In

Double Tap = Reset Zoom to 100%

Touch and Drag = Move document in direction of the drag

Swipe Left = Next Page

Two Finger Swipe Left = Last Page of Document

Swipe Right = Previous Page

Two Finger Swipe Right = First Page of Document

Multi-Touch Rotate Clockwise = Scroll Pages of Document Forward  
189 of 999

Multi-Touch Rotate Counter Clockwise = Scroll Pages of Document Backward  
159 of 999

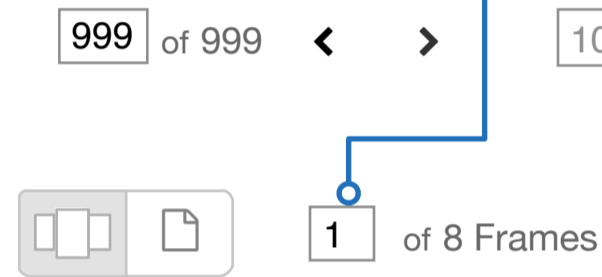

## MultiFrame Page of Document Navigation

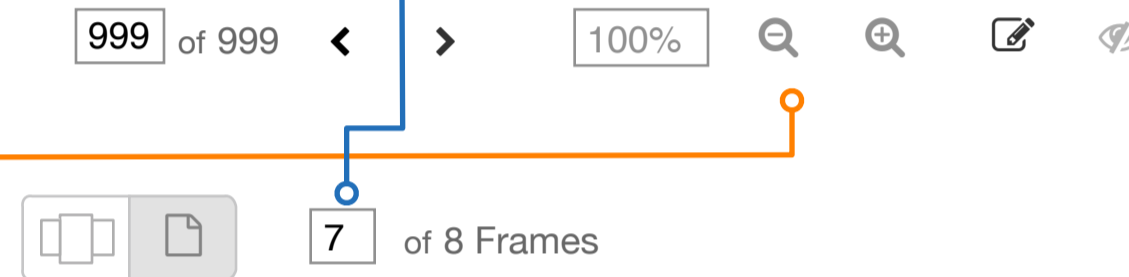

### Entering Annotations Mode

What ever number is in the Frame Input Field becomes the Frame they are annotating

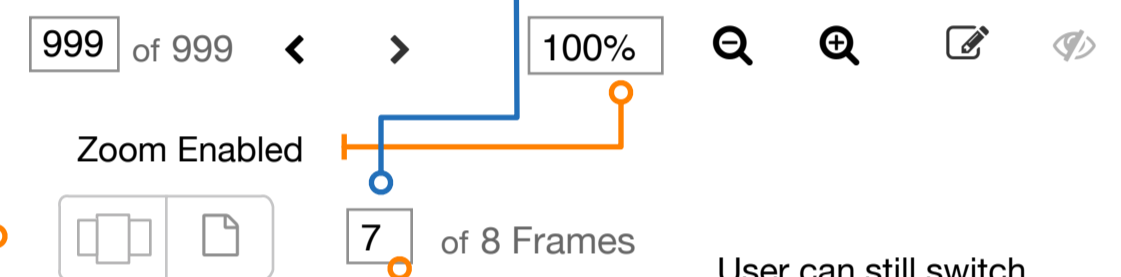

#### Thumbnail View

#### Scroll View

#### Focused Frame View

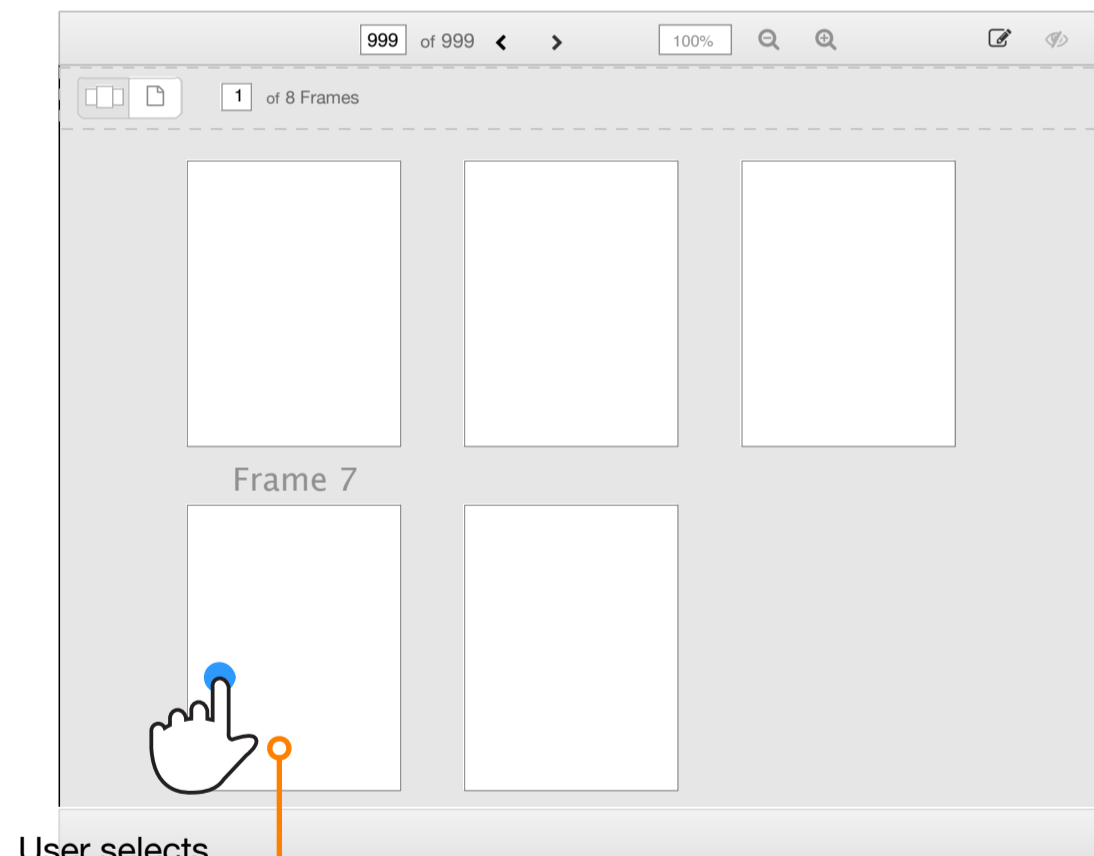

Zoom Disabled in Thumbnail and Scroll View Modes

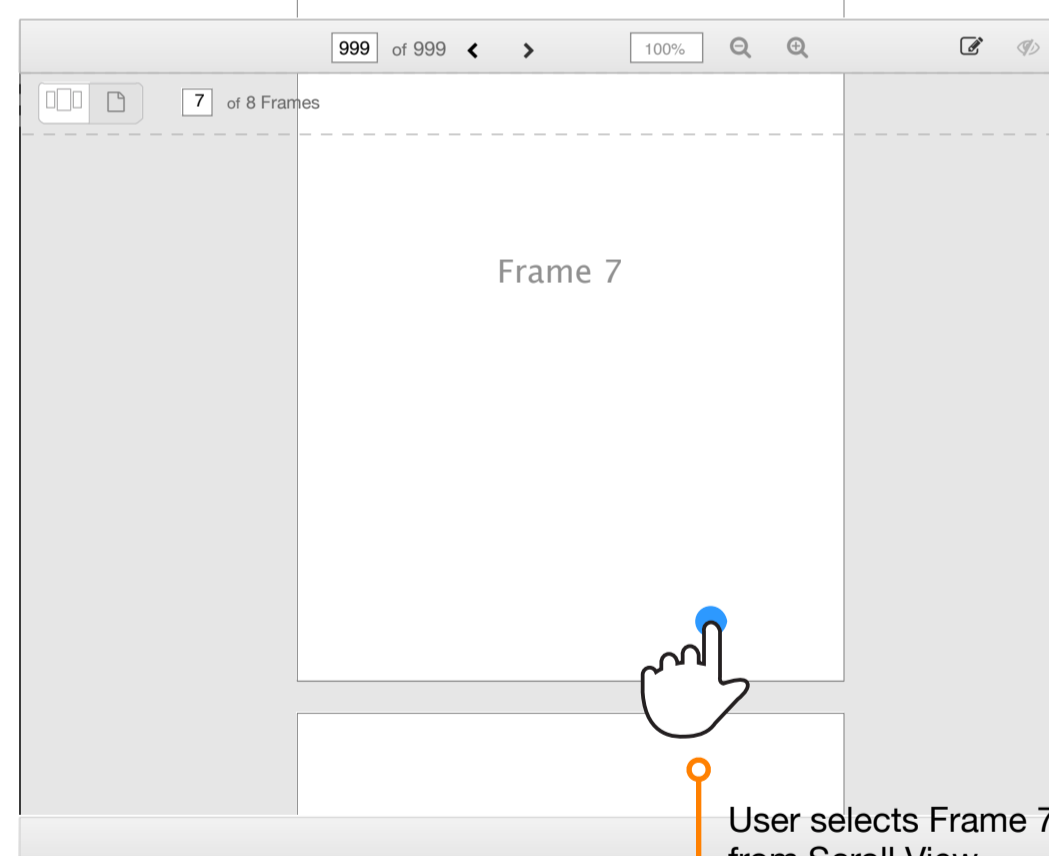

Zoom Enabled

User can still switch frames with input

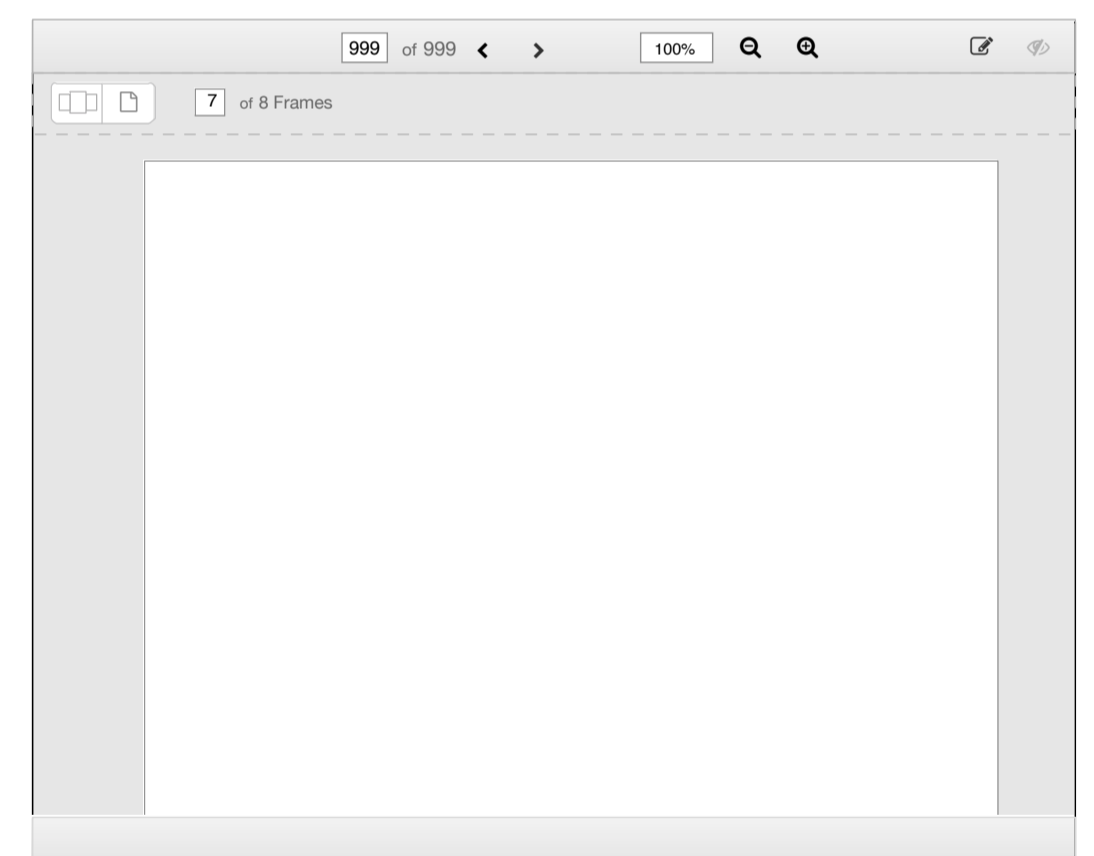

Neither view is selected. User is focused on Frame 7 until they select a different view mode or page away

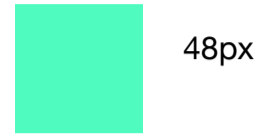

User selects Frame 7 from Thumbnail View

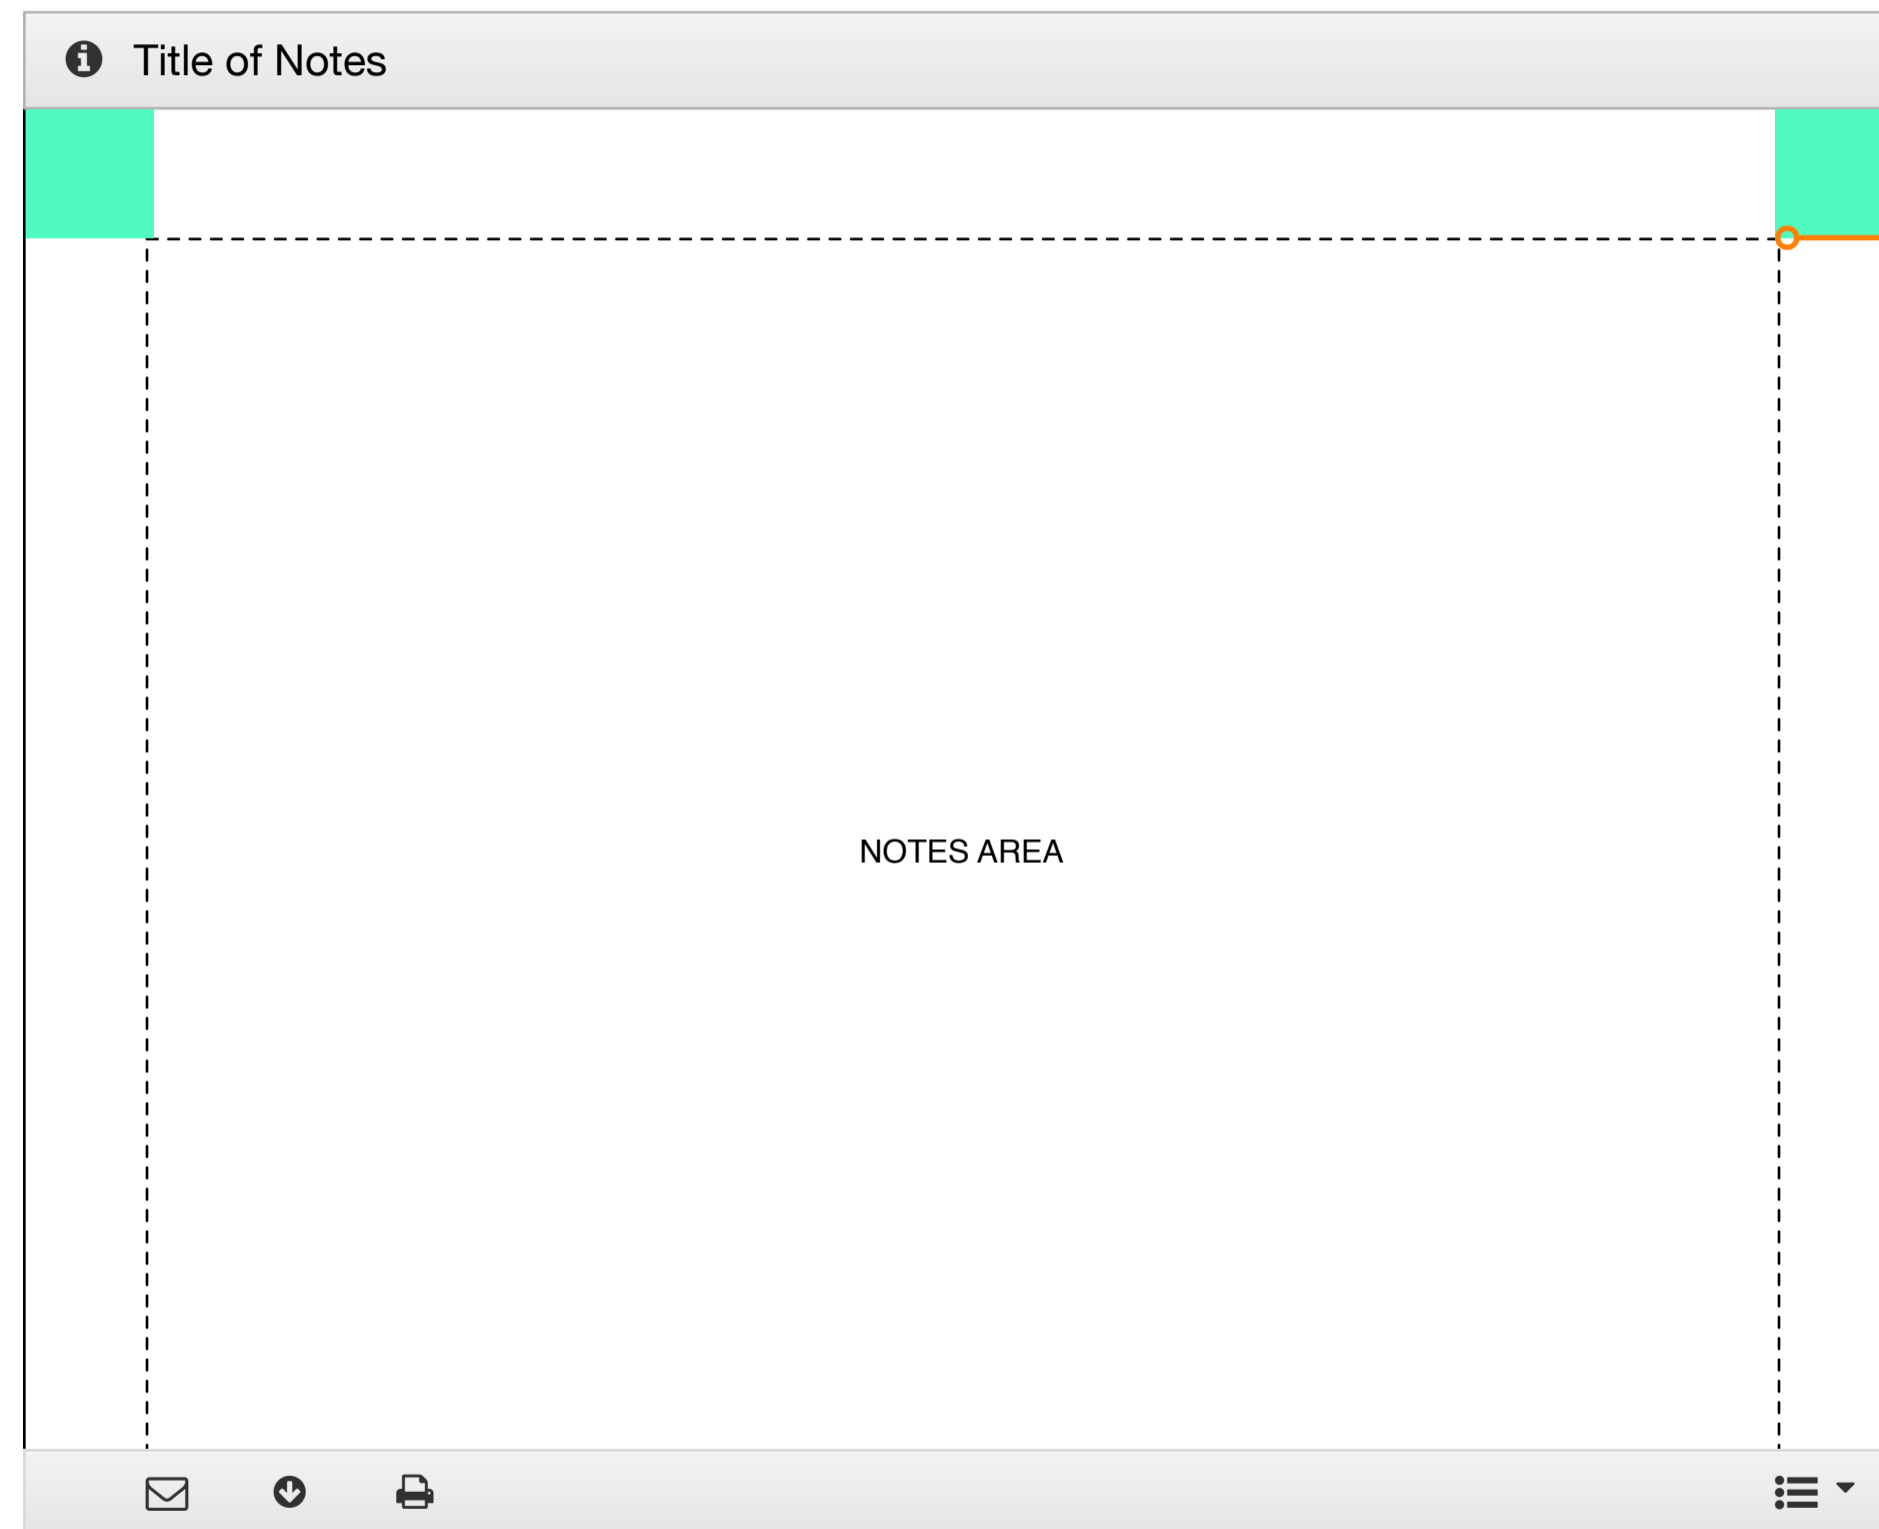

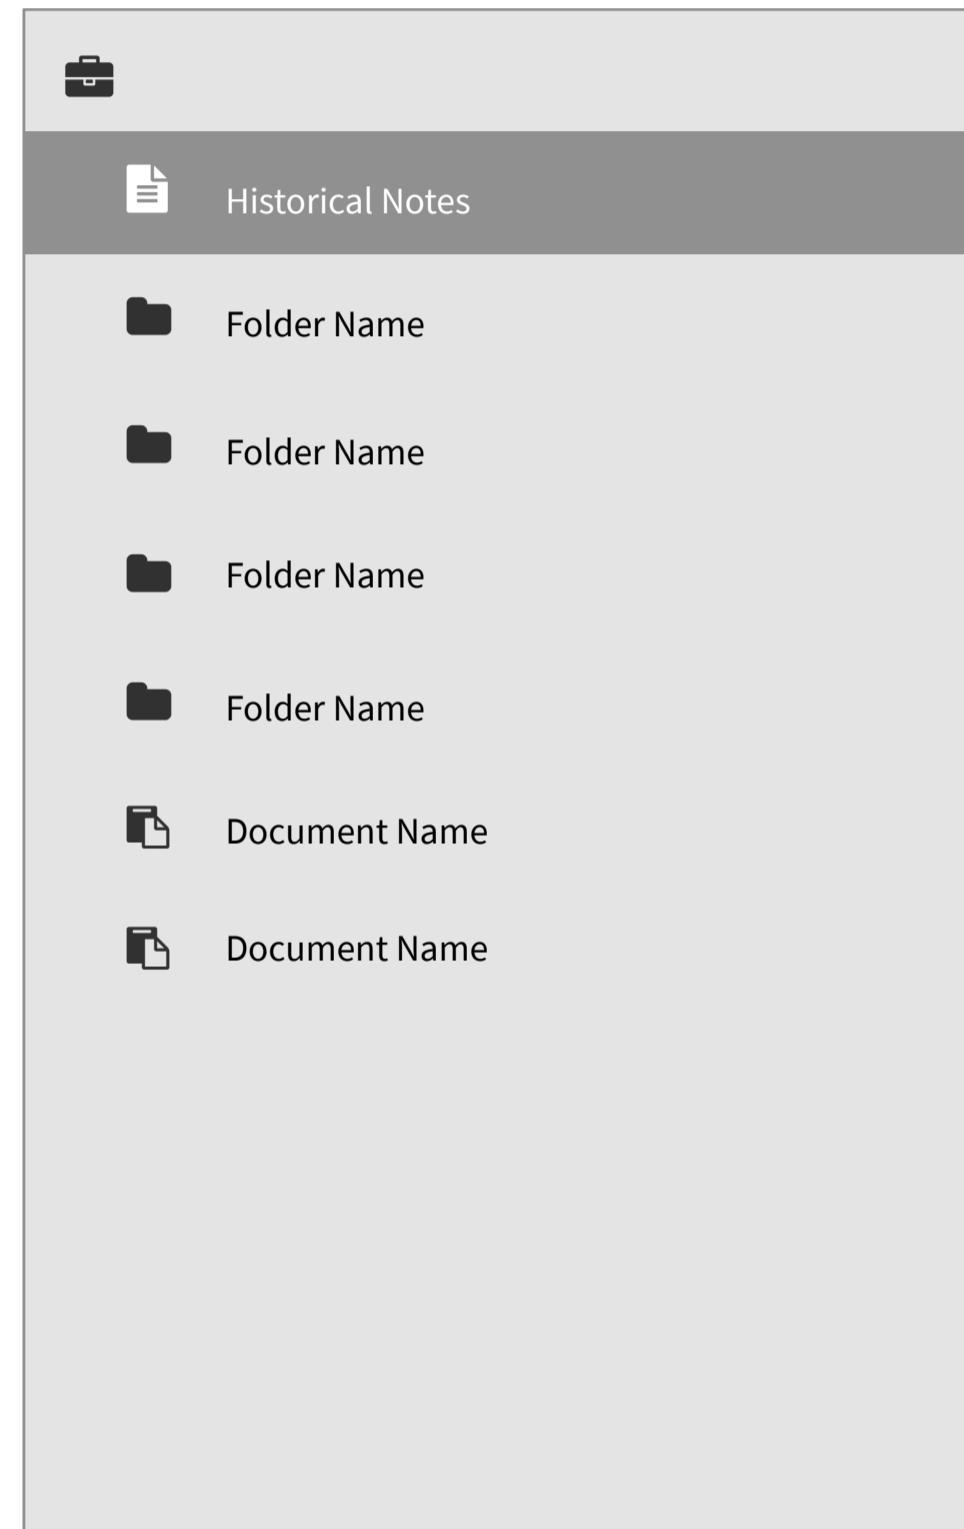

User selects Frame 7 from Scroll View

Frame 8

When Historical Notes are selected in the tree

Top of Notes

Scrollable
